

Day 08 NEXT-5 â AgentMail Connector Proof

Objective

Move AgentMail from vague visibility to exact incoming/outgoing connector truth.

Result

BLOCKED/PARTIAL (connector surfaces visible; send remains blocked and Bridge-gated).

Actions Executed

1. Queried Gateway registry for AgentMail node visibility.
2. Queried Bridge execution adapters and filtered AgentMail send adapter state.
3. Probed execution path with 'agentmail.send' action under current session state.
4. Verified no unrestricted external send was executed.

Commands / Routes / Proof

- Evidence: 'runtime/day-08-next-5-agentmail-proof.json'
- Route results:
 - 'GET /api/gateway/registry' -> '200'; 'integration_agentmail' status 'blocked', blocker 'email_provider_not_visible_or_configured'
 - 'GET /api/bridge/agent-zero/execute' -> '200'; adapter 'agentmail.send' present, status 'blocked', blocker 'agentmail_send_connector_not_configured'
 - 'POST /api/bridge/agent-zero/execute' ('agentmail.send') -> '423', blocker 'active_bridge_session_required'

Exact Blockers

- 'email_provider_not_visible_or_configured'
- 'agentmail_send_connector_not_configured'
- 'active_bridge_session_required'

Owner Action Package

1. Configure approved AgentMail provider/connector.
2. Confirm domain allow-list policy.
3. Approve scoped Bridge Session.
4. Run one allowed-domain send proof and verify audit.

Files Changed

- 'runtime/day-08-next-5-agentmail-connector-proof.md'
- 'runtime/day-08-next-5-agentmail-connector-proof.pdf'
- 'runtime/day-08-next-5-agentmail-proof.json'

Tests / Services / Commits

- Tests: focused adapter status + execution-gate probes.
- Services: Mission Control runtime local-only.
- Commits: pending Day 08 batch commit.

Rollback

- Report-only rollback: 'git revert <day08_report_commit_sha>'

No-Secrets Confirmation

- No API keys printed.
- No auth files printed.
- No '.env' changes.

Updated Percentage

- AgentMail remains PARTIAL/BLOCKED until connector config and one approved allowed-domain send proof.

Exact Next Step

Proceed with YouTube transcript escalation and Firecrawl parallel status while awaiting connector + approval unblock.
