Day 08 â OpenClaw+ Owner/Admin Action Package

Objective

Unblock authenticated OpenClaw+ doctor execution in Mission Control without weakening auth and without '.env' edits.

Current Truth

- 'GET /api/openclaw/doctor' returns '400'.
- 'POST /api/openclaw/doctor' returns '400'.
- Response: 'OpenClaw is not installed or not reachable'.
- Runtime user/context: 'sosastrike'.
- Runtime bind: '127.0.0.1:3337' (local-only).

Exact Blocker

- 'openclaw_doctor_runtime_not_reachable'

Root Cause

No executable OpenClaw+ CLI binary is reachable from Mission Control runtime PATH or configured fallback binary path.

Required Owner/Admin Action

Install or expose one approved CLI binary for runtime execution:

1. Preferred binary: 'openclaw'
2. Accepted fallback binaries: 'clawdbot', 'claudeclaw'
3. Ensure Mission Control runtime service user can execute the binary.
4. Expose via one of:
 - runtime PATH, or
 - 'OPENCLAW_BIN', or
 - 'CLAWDBOT_BIN', or
 - 'OPENCLAW_FALLBACK_BIN' (service-manager level)

Safety Rules Preserved

- No secrets printed.
- No auth files printed.
- No '.env' changes.
- No auth weakening.
- No destructive repair.
- No deletion of agents/skills/memory/reports/governance.

Codex Verification Steps After Owner/Admin Action

1. Restart Mission Control runtime if required by service manager.
2. Run authenticated:
 - 'GET /api/openclaw/doctor'
 - 'POST /api/openclaw/doctor' (safe path only)
3. Confirm doctor returns real payload with issue list/count.
4. Start Day 08 OpenClaw+ issue-reduction phase immediately after payload is live.

Files Changed

- 'runtime/day-08-openclaw-owner-admin-action-package.md'
- 'runtime/day-08-openclaw-owner-admin-action-package.pdf'

Tests / Services / Commits

- Tests: not applicable for this action package.
- Service state: Mission Control runtime remained local-only on '127.0.0.1:3337'.
- Commits: pending Day 08 batch commit.

Rollback

- Report-only rollback: 'git revert <day08_report_commit_sha>'

No-Secrets Confirmation

- Confirmed: no secret values, tokens, or auth file contents exposed.

Updated Percentage

- OpenClaw+ readiness can increase for blocker clarity only.
- OpenClaw+ cannot move to GO until doctor payload is live and issue reduction executes.

Exact Next Step

Continue non-dependent Day 08 tracks (Bridge, Paperclip, Telegram, Drive/OneDrive, AgentMail, YouTube, Firecrawl parallel) while owner/admin unblocks CLI runtime.
