

day-100-final-go-no-go-declaration

Day 100 - Final GO / NO-GO Declaration 100% Closure

- Lane: Final GO / NO-GO declaration
- Status: FINAL DECLARATION COMPLETE
- Final recommendation: PARTIAL GO
- Started from commit: 2e633a662ecb1eef0f1d04c1c022062f8c8accbb
- Closed at: 2026-05-12T07:11:00Z

Declaration

This system is not a full GO. It is PARTIAL GO because core developer-side proofs, safety gates, build, tests, and local-only deployment are passing, while multiple lanes remain OWNER_GATED or CREDENTIAL_GATED. No lane is marked GO without proof.

Final Matrix Summary

- GO: 3 lanes
- PARTIAL GO: 11 lanes
- BLOCKED: 13 lanes
- Unresolved blocker rows: 25
- Invalid final blocker classes: 0
- HARD_RESET_REQUIRED: none

The full lane matrix is in 'runtime/day-100-final-go-no-go-declaration/final-proof-packet.json'.

Runtime '.log' files were not staged.

Routes / Endpoints Checked

- /login
- /gateway
- /api/bridge/connector-readiness
- protected route-smoke inventory
- authenticated route-smoke inventory
- /api/gateway/agent-hub/proof-packet through Day 99 final table
- /api/bridge/connector-proof-packet through Day 99 final table
- /api/bridge/approval-proof-packet through Day 99 final table

UI Behavior

Mission Control/Gateway owner UI is not declared 100% GO because owner-authenticated visual proof remains OWNER_GATED. Static designer contract and route protection were proven earlier, but actual owner-session screenshots/video were not available.

No designer HTML/CSS/class names were changed. No fake buttons, fake LIVE, fake DONE, raw paths, or fake authenticated proof were introduced.

Service / Runtime Behavior

- Runtime: Next standalone bundle
- Base URL: http://127.0.0.1:3337
- Bind: 127.0.0.1 only
- Screen session: mc-day100
- PID: 11224
- Deployed commit: 2e633a6
- Public exposure added: false
- Rollback available: yes

Final Checks Run

- git diff --check: PASS
- .env diff check: PASS
- pnpm run typecheck: PASS
- pnpm run build: PASS
- pnpm test: PASS, 209 files / 1517 tests
- Standalone deploy proof: PASS
- Runtime listener proof: PASS
- Protected route smoke: PASS
- Authenticated route smoke: PASS with blocker_class OWNER_GATED
- Protected-file invariant scan: PASS
- Secret scan: PASS
- Raw exposure scan: PASS

- runtime/day-100-final-go-no-go-declaration/protected-file-invariants.json

Unresolved Blockers

Remaining blockers are external gates from the Day 99 final blocker table:

- CREDENTIAL_GATED: Agent Zero external API key, SpaceAgent/Playwright credential or service set up, Telegram, AgentMail, Google Drive, OneDrive, Zapier, HeyGen.
- OWNER_GATED: Paperclip sandbox service, Hermes installation/live service, OpenClaw+ doctor run time, owner-auth visual proof/session, Build-Wiki/Brain approval-scoped runtime actions.

No HARD_RESET_REQUIRED blocker was found.

Owner Action Required

Provide missing credentials/OAuth/provider sessions and start/install required local services where desired. Provide a safe owner-authenticated browser session/cookie for final owner visual proof. Approve Bridge-scoped actions only when exact scopes and rollback are visible.

Rollback Command

```
screen -S mc-day100 -X quit; kill $(cat .next/standalone/server.pid 2>/dev/null) 2>/dev/null || true; git revert <day-100-final-go-no-go-declaration-commit>
```
