

Gateway v3 Owner Visual Proof - Partial

Objective

Reclassify owner visual proof now that '/gateway/agent-hub' is visible in an authenticated owner browser session.

Actions

1. Recorded owner-confirmed visibility of '/gateway/agent-hub'.
2. Reclassified blocker from 'owner_authenticated_browser_session_required' to 'owner_visual_proof_of_partial_navigation_layout_defect'.
3. Moved Gateway UI track into implementation lane (navigation/scroll/layout fixes) instead of route-proof lane.

Files Changed

- None (status/report reclassification only).

Commands / Routes

- Owner-confirmed route: '/gateway/agent-hub'.

Proof

- Owner reported authenticated page visibility.
- Owner also reported trapped navigation and scroll defects.

Blockers

- 'owner_visual_proof_partial_navigation_layout_defect'

Tests

- Not applicable in this phase.

Services

- No restart required for status-only reclassification.

Commits

- None in this phase.

Rollback

- Not applicable.

No-Secrets Confirmation

- No secrets printed.
- No auth files printed.
- No '.env' changes.

Updated Percentages

- Owner visual proof track: 'blocked -> partial' (visibility proven, UX defects open).
- Gateway/Agent Hub overall: remains PARTIAL GO.

Exact Next Step

- Apply shell navigation, breadcrumb, and scroll-trap fixes on Gateway/Agent Hub surfaces.
