

Gateway v3 Scroll/Layout Fix

Objective

Remove trapped-page behavior and restore natural scrolling on Gateway and Agent Hub routes.

Actions

1. Converted Gateway/Agent Hub root containers from 'min-h-screen' to 'h-full overflow-y-auto' so pages scroll inside the app shell.
2. Applied the same pattern to status and space-agent Gateway pages to prevent route-specific scroll traps.
3. Kept content structure intact; no fake UI or hidden sections introduced.

Files Changed

- 'src/components/gateway/GatewayControlShell.tsx'
- 'src/components/gateway-agent-hub/AgentHubControlCenter.tsx'
- 'src/app/gateway/status/page.tsx'
- 'src/app/gateway/space-agent/page.tsx'

Commands / Routes

- Updated scroll behavior intended for:
 - '/gateway'
 - '/gateway/routes'
 - '/gateway/registry'
 - '/gateway/policies'
 - '/gateway/health'
 - '/gateway/dispatcher'
 - '/gateway/token-governor'
 - '/gateway/agent-hub'

Proof

- All modified route roots now explicitly expose vertical scrolling via 'overflow-y-auto'.
- Gateway pages remain embedded under Mission Control shell without viewport lock.

Blockers

- Owner confirmation pending on real browser session for final UX acceptance.

Tests

- 'pnpm run typecheck' PASS
- 'pnpm test' PASS
- 'pnpm run build' PASS

Services

- No service restart executed in this phase.

Commits

- Pending at report creation time.

Rollback

- Planned after commit: 'git revert <ui_scroll_commit_sha>'

No-Secrets Confirmation

- No secrets printed.
- No '.env' changes.

Updated Percentages

- UI navigation/scroll readiness increased.
- Owner visual proof still PARTIAL GO until owner validates interaction quality.

Exact Next Step

- Perform production smoke + owner re-test checklist execution.
