

## # Gateway v3 UI Production Smoke

### ## Objective

Validate the Gateway/Agent Hub UI fix batch with build/test gates and production route smoke.

### ## Actions

1. Ran diff integrity check.
2. Ran TypeScript typecheck.
3. Ran production build.
4. Ran full test suite.
5. Ran button-contract route parity scan.
6. Ran protected-file invariant scan.
7. Ran production route rendering smoke against 'https://tkmc.knowledge-vs-ai.com'.
8. Ran unauthenticated route smoke for Gateway and alias paths.
9. Verified '.env' was unchanged.

### ## Files Changed

- 'src/components/gateway/GatewayControlShell.tsx'
- 'src/components/gateway-agent-hub/AgentHubControlCenter.tsx'
- 'src/app/gateway/status/page.tsx'
- 'src/app/gateway/space-agent/page.tsx'

### ## Commands / Routes

- 'git diff --check' -> PASS
- 'pnpm run typecheck' -> PASS
- 'pnpm run build' -> PASS
- 'pnpm test' -> PASS ('138' files / '1250' tests)
- 'node scripts/check-button-contract-routes.mjs' -> PASS
- 'node scripts/check-protected-file-invariants.mjs' -> PASS
- 'node scripts/check-mission-control-route-rendering.mjs https://tkmc.knowledge-vs-ai.com' -> PARTIAL (auth-gated APIs returned 401 in this runner context)
- Unauthenticated smoke:
  - '/gateway'
  - '/gateway/routes'
  - '/gateway/registry'
  - '/gateway/policies'
  - '/gateway/health'
  - '/gateway/dispatcher'
  - '/gateway/token-governor'
  - '/gateway/agent-hub'
  - '/agent-network'
  - '/agents'
  - '/gateway-parent'
  - '/gateways'
  - '/gateway-config'
- all returned '307 -> /login' as expected for protected access.

### ## Proof

- Build/test/contract gates are green for this UI batch.
- Production Gateway and alias routes remain protected and reachable.
- No regression in no-fake-button contract map.

### ## Blockers

- 'owner\_visual\_proof\_partial\_navigation\_layout\_defect' remains open until owner re-test confirms the fixed UI.
- 'authenticated\_local\_smoke\_blocked\_by\_mission\_control\_api\_key\_not\_seeded' remains for full authenticated script-level smoke in this runner context.

### ## Tests

- 'pnpm run typecheck' PASS
- 'pnpm run build' PASS
- 'pnpm test' PASS

### ## Services

- No production restart executed in this phase.

### ## Commits

- Pending at report creation time.

### ## Rollback

- Planned after commit: 'git revert <ui\_fix\_commit\_sha>'

### ## No-Secrets Confirmation

- No secrets printed.
- No auth files printed.
- '.env' diff remains clean.

### ## Updated Percentages

- Gateway/Agent Hub UI integration: improved to strong PARTIAL pending owner verification.
- Owner visual proof remains PARTIAL (not GO).

### ## Exact Next Step

- Provide owner re-test checklist and wait for owner confirmation on navigation/scroll behavior in authenticated UI.
