

Phase 2 — Owner-Authenticated Browser Visual Proof

Generated: 2026-05-08T00:15:34Z

Result

Status: BLOCKED / PARTIAL

Exact blocker: owner_authenticated_browser_session_required. Codex does not have an owner-authenticated browser session available for a real visual smoke. I did not read, reuse, export, or print session cookies or tokens.

Required Visual Checks

Check	Result	Evidence
Open Mission Control as owner	BLOCKED	owner browser session unavailable
Open Gateway	BLOCKED	requires owner browser session
Open Agent Hub / Control Center	BLOCKED visually	API route is live; visual page cannot be owner-authenticated here
Open SpaceAgent panel	BLOCKED visually	SpaceAgent API detail route returns data
Playwright MCP green / connected local-only	PASS via API	`/api/gateway/space-agent/browser/status` card truth
Firecrawl red / blocked	PASS via API	blocker `firecrawl_credential_required`
YouTube Research yellow / limited	PASS via API	blocker `youtube_transcript_connector_not_proven`
Paperclip partial/degraded, not fake-live	PASS via API	Agent Hub roster shows Paperclip pending/degraded
No secrets/raw paths/auth files/task IDs/fake buttons	PASS via API review	No unsafe owner-facing values observed in summarized payloads

Route Proof

Screenshot / Snapshot Evidence

No owner-authenticated screenshot was captured. Supporting API evidence is not a substitute for the required owner visual proof. The correct next action is an owner/admin browser session smoke after Mission Control is restarted.

Security / Governance Confirmation

- No secrets, tokens, auth files, session cookies, API keys, raw local paths, or task IDs were printed.
- No .env file was modified.
- No auth bypass was attempted.
- No external writes, Zapier writes, HeyGen generation, SMB/Fork 2, farmer execution, email send, upload, or attachment send occurred.
- OpenClaw+ naming remains correct.

Phase 2 Decision

Phase 2 remains BLOCKED / PARTIAL until an owner-authenticated browser session is available and the actual Gateway → Agent Hub → SpaceAgent visual page is verified.
