

Phase 7 - SpaceAgent Live Read-Only Research Proof

Generated: 2026-05-07T21:05:01-04:00

Result

****PARTIAL GO****

SpaceAgent read-only research is proven for the Playwright MCP browser path and supported by the YouTube transcript proof from Phase 6. Firecrawl remains blocked because Phase 5 found no Mission Control credential or backend package.

Live Playwright MCP Proof

A direct local-only MCP smoke was run against a public page.

Check	Result
MCP initialize HTTP	200
Tool count	23
Required tools present	yes
Safe public navigation	pass
Snapshot available	pass
Snapshot matches requested page	pass
Console evidence available	pass
Network evidence available	pass
Screenshot evidence available	pass
Public exposure	false
Execution enabled	false
Writes enabled	false
External writes enabled	false

Research Flow Coverage

Flow Stage	Result
Owner request to Gateway	contract tested
Pi route recommendation	contract tested
Agent Zero approval	contract tested
SpaceAgent research stage	Playwright MCP direct proof passed
ResearchPacket return	schema/contract tested
Hermes workflow plan from packet	contract tested, planning only
Firecrawl branch	skipped, firecrawl_credential_required

YouTube branch	Phase 6 transcript proof passed
Delivery/write/upload/SMB/farmer	not executed

Route Protection Smoke

Unauthenticated route checks after Mission Control restart:

Route	Result	Meaning
GET /api/gateway/space-agent/research	401	protected
GET /api/gateway/nodes/space-agent	401	protected
GET /api/gateway/space-agent/browser/status	401	protected

Authenticated owner-browser proof remains pending because owner session material is unavailable in this worker context.

Tests

Test	Result
src/lib/space-agent-browser-automation.test.ts	2 passed
src/lib/space-agent-end-to-end-research-flow.test.ts	2 passed
src/lib/space-agent-research.test.ts	29 passed
Combined focused tests	33 passed

Security Confirmation

- No secrets printed.
- No auth files printed.
- No ``.env`` changes.
- No external writes.
- No form submit, upload, authenticated browsing, Zapier, HeyGen, SMB, or farmer action.
- Playwright MCP stayed local-only.
- SpaceAgent remains the agent; Playwright MCP is only the browser automation tool.

Updated Percentage

System	Previous	Updated
Playwright MCP	90% GO local-only read-only	93% GO local-only read-only
SpaceAgent	70% PARTIAL GO	74% PARTIAL GO
Firecrawl	25% blocked	25% blocked
YouTube research	72% PARTIAL GO	72% PARTIAL GO

Exact Next Step

Expose the proven Playwright MCP evidence path through authenticated Mission Control production UI/browser smoke, then add the Firecrawl credential/backend and persistent YouTube route wiring when approved.

Rollback

This phase changed only reports. Rollback command after commit:

```
`git revert <phase-7-commit>`
```
