Day 92 â UX Final Closeout

Status: developer-side closure passed.

Blocker classification: NONE for developer-side Day 92. Authenticated owner visual proof remains OWNER_GATED because no owner browser session cookie was supplied.

What Was Implemented

- Audited the UX final-pass contract from Days 83â 91 against the current runtime.
- Confirmed the Gateway production surface follows the approved Pattern A: one '/gateway' surface redirects into the designer Mission Control shell, and Gateway sub-tabs load raw static design HTML from '/design/gateway/*.html'.
- Confirmed Agent Hub and Paperclip production-mounted HTML remain byte-for-byte identical to the accepted designer source files.
- Confirmed browser/app back, Mission Control Home, Gateway tab exits, responsive horizontal access, focus states, owner-facing error copy, and no-fake UI contracts are guarded by tests.
- No source code changes were required for Day 92; the closure adds proof artifacts and this ledger.

Files Changed

- 'runtime/day-92-ux-final-closeout.md'
- 'runtime/day-92-ux-final-closeout.pdf'
- 'runtime/day-92-ux-final-closeout/*'

Routes/Endpoints Changed

- None.

UI Behavior

- Gateway remains the designer mock surface. No Gateway mock HTML, CSS, or class names were modified.
- '/gateway' remains the primary entry.
- '/gateway?tab=agent-hub' and '/gateway?tab=paperclip' remain internal GatewayShell states.
- Compatibility routes such as '/gateway/agent-hub' and '/gateway/agent-hub/paperclip' remain protected and redirect through the authenticated Gateway shell flow.
- Direct design assets under '/design/gateway/*.html' remain auth-protected and frame-safe for same-origin Gateway embedding.

Service/Runtime Behavior

- Runtime proof used a localhost-only standalone server on '127.0.0.1:3346'.
- No external writes were executed.
- No '.env' files were modified.
- No approved designer mock source was edited.
- Proof server was stopped after diagnostics.

Tests Run

- 'git diff --check'
- 'git diff -- .env .env.local .env.production --exit-code'
- 'pnpm run typecheck'
- 'pnpm run build'
- 'pnpm test'
- 'node scripts/protected-route-smoke-contract.mjs http://127.0.0.1:3346'
- 'node scripts/authenticated-route-smoke-contract.mjs http://127.0.0.1:3346'
- 'node scripts/check-protected-file-invariants.mjs'
- 'node scripts/secret-scan-contract.mjs'
- 'node scripts/raw-exposure-scan-contract.mjs'

Deploy/Restart/Smoke Result

- Production build passed and synced static assets into '.next/standalone'.
- Local proof restart: standalone server started on '127.0.0.1:3346', route smokes and scans completed, server stopped.
- Protected route smoke: 'ok: true', 'failures: 0'.
- Authenticated route smoke without owner session: 'ok: true', 'blocker_class: OWNER_GATED', 'authenticated_smoke_proven: false'.

Proof Artifacts

- 'runtime/day-92-ux-final-closeout/ux-inventory.json'
- 'runtime/day-92-ux-final-closeout/designer-fidelity-hashes.json'

- 'runtime/day-92-ux-final-closeout/unauthenticated-paperclip-login-redirect.png'

Remaining Blocker

- OWNER_GATED: authenticated owner screenshots/video require an owner browser session.
- Day 92 developer-side blocker: NONE.

Rollback Command

```
""bash
git revert --no-edit <day-92-closure-commit>
""
```

Commit/Push

- Base commit before Day 92 closeout: 'f23a5762c2be1eb640a42d323d662cb35c209825'
- Closure commit hash: recorded in final closeout after exact-path staging and commit.
- Push result: recorded in final closeout after push.

Next Day

Day 93 â Full Regression Test automatically starts after Day 92 commit/push.
