Day 71 â Production Restart Proof

Date: 2026-05-11

Status: PASS â local-only restart proof complete

Blocker class: NONE for developer-side restart proof

Lane

Runtime / deployment / restart recovery.

What Was Implemented

- Added a restart proof contract script that verifies a controlled Mission Control standalone restart.
- Added tests for restart proof success, failed PID change, local-only URL enforcement, and unsafe text detection.
- The restart proof checks the live listener PID, login page, runtime health, and monitoring failure-state endpoint.
- The proof script reads the standalone runtime auth store when needed, but never prints auth values.

Files Changed

- 'scripts/restart-proof-contract.mjs'
- 'src/lib/restart-proof-contract.test.ts'
- 'runtime/day-71-production-restart-proof.json'
- 'runtime/day-71-production-restart-proof.md'
- 'runtime/day-71-production-restart-proof.pdf'

Routes / Endpoints Proved

- 'GET /login'
- 'GET /api/runtime/health'
- 'GET /api/runtime/failure-states'

UI / Service Behavior

- No UI redesign.
- No Gateway mock HTML/CSS/class changes.
- Mission Control restart stayed on '127.0.0.1:3337'.
- No public local exposure was added.

Runtime Proof

- Before restart PID: '69803'
- After restart PID: '86113'
- Listener PIDs after restart: '86113'
- Login probe: HTTP 200, Mission Control present
- Runtime health probe: HTTP 200, 'runtime_status: LIVE', bind expected host '127.0.0.1'
- Failure states probe: HTTP 200, 'no_fake_live_status: true', 'no_external_writes_executed: true'
- Failures: none

Proof artifact: 'runtime/day-71-production-restart-proof.json'

Tests / Checks Run

- 'pnpm test src/lib/restart-proof-contract.test.ts'
- Controlled local-only restart with 'MC_HOSTNAME=127.0.0.1 PORT=3337 bash scripts/start-standalone.sh'
- 'node scripts/restart-proof-contract.mjs http://127.0.0.1:3337'
- 'git diff --check'
- 'node scripts/check-protected-file-invariants.mjs'
- 'node scripts/secret-scan-contract.mjs'

Full validation is run before commit/push in the final Day 71 closeout gate.

Safety Confirmation

- No '.env' changes.

- No secrets printed.
- No auth weakening.
- No external writes.
- No Zapier writes.
- No SMB/Fork 2.
- No public bind.

Rollback

Use:

```
““bash
```

```
git revert <day-71-restart-proof-commit-sha>
```

```
MC_HOSTNAME=127.0.0.1 PORT=3337 bash scripts/start-standalone.sh
```

```
““
```

Next Day Started

Day 72 â Runtime Final Closeout starts automatically after Day 71 commit/push.
