Day 05 Phase 4 â Telegram Adapter Route Smoke

Objective

Smoke the new Telegram delivery adapter routes on rolled-out runtime and classify true state (GO / GATED / BLOCKED).

Result

GATED/BLOCKED (honest, no fake send).

Actions Executed

1. Created a fresh Mission Control report through:
 - 'POST /api/bridge/agent-zero/reports'
2. Smoked Telegram status route:
 - 'GET /api/bridge/agent-zero/telegram/status'
3. Smoked Telegram upload route:
 - 'POST /api/bridge/agent-zero/telegram/upload-report' with fresh 'report_id'

Route Results

- Fresh report creation: PASS ('ok=true', report created)
- Telegram status route:
 - 'status=blocked'
 - 'connector_configured=false'
 - 'blocked_reason=telegram_report_delivery_adapter_not_configured'
- Telegram upload route:
 - 'ok=false'
 - 'status=blocked'
 - 'accepted_for_execution=false'
 - 'blocked_reason=bridge_session_persistence_not_applied'

Classification

- Telegram PDF attachment: ****BLOCKED/GATED****
- Not GO yet.
- No successful Telegram document send occurred.
- No fake completion was reported.

Safety Confirmation

- No bot token printed.
- No raw local path exposed.
- No fake â sentâ claim.
- Owner route authority remains Agent Zero chain; Tony active commander is not used for this adapter flow.
- Bot display-name rename remains a separate BotFather owner action if still needed.

Files Changed

- 'runtime/day-05-phase-4-telegram-adapter-route-smoke.md'
- 'runtime/day-05-phase-4-telegram-adapter-route-smoke.pdf'

Blockers

- 'telegram_report_delivery_adapter_not_configured'
- 'bridge_session_persistence_not_applied'

Exact Next Step

Unblock Bridge Session persistence and Telegram connector configuration, then rerun one scoped attachment attempt for GO proof.
