

day-05-phase-5-youtube-connector-production-smoke

Day 05 Phase 5 â YouTube Connector Production Smoke

Objective

Smoke YouTube connector routes in production runtime and prove current metadata/transcript state without bypasses.

Result

LIMITED (improved route proof, transcript not proven).

Actions Executed

1. Checked YouTube connector status route:
 - 'GET /api/gateway/space-agent/youtube/status'
2. Ran research route smoke with public video request:
 - 'POST /api/gateway/space-agent/youtube/research'
 - request included public URL: 'https://www.youtube.com/watch?v=dQw4w9WgXcQ'

Route Results

- Status route:
 - 'ok=true'
 - 'status=limited'
 - 'transcript_connector_proven=false'
 - 'blocked_reason=youtube_transcript_connector_not_proven'
- Research route:
 - 'ok=true'
 - packet mode returned
 - 'packet.status=limited'
 - 'blocked_reason=youtube_transcript_connector_not_proven'
 - transcript segments returned: '0'

Metadata / Transcript Outcome

- Connector route wiring is live.
- Transcript-backed claim extraction is not yet proven in this runtime.
- No full video download performed.
- No login/age/region/paywall bypass used.

Classification

- YouTube connector: ****LIMITED**** (not GO).

Files Changed

- 'runtime/day-05-phase-5-youtube-connector-production-smoke.md'
- 'runtime/day-05-phase-5-youtube-connector-production-smoke.pdf'

Blocker

- 'youtube_transcript_connector_not_proven'

Exact Next Step

Enable and prove transcript runtime path (connector + dependency + provider behavior), then rerun public transcript-enabled smoke for GO.
