Day 05 Phase 6 â Paperclip Owner Session Retry

Objective

Move Paperclip beyond health-only proof by validating owner-session and read-only workforce routes.

Result

BLOCKED (service reachability and owner session still not proven).

Actions Executed

1. Queried Paperclip bridge routes:
 - 'GET /api/bridge/paperclip/status'
 - 'GET /api/bridge/paperclip/companies'
 - 'GET /api/bridge/paperclip/agents'
 - 'GET /api/bridge/paperclip/issues'
2. Reviewed returned Paperclip service metadata and blocker details.

Route Results

- 'GET /api/bridge/paperclip/status': '200'
- 'health=degraded'
- 'reachable=false'
- 'configured=false'
- 'ui_link' present (local loopback target)
- 'service.local_only=true'
- 'service.public_exposure=false'
- 'blocker=paperclip_sandbox_service_not_running'
- 'GET /api/bridge/paperclip/companies': '503'
- 'GET /api/bridge/paperclip/agents': '503'
- 'GET /api/bridge/paperclip/issues': '503'

Classification

- Paperclip remains **PARTIAL / BLOCKED** for owner session and live workforce data.

Owner Action Package

1. Open the Paperclip local/Tailnet session URL exposed by Mission Control status panel.
2. Complete owner login session in Paperclip.
3. Confirm dashboard, company roster, agent roster, and task queue load.
4. Notify Codex to rerun the four bridge routes above for live read-only proof.

Safety Confirmation

- No public exposure added.
- Writes/task creation remain blocked unless Bridge Session and adapter scope exist.
- Paperclip role remains Workforce Control Plane before OpenClaw+.

Files Changed

- 'runtime/day-05-phase-6-paperclip-owner-session-retry.md'
- 'runtime/day-05-phase-6-paperclip-owner-session-retry.pdf'

Blockers

- 'paperclip_sandbox_service_not_running'
- 'paperclip_owner_session_required'

Exact Next Step

Bring Paperclip sandbox service/session online and rerun read-only workforce routes for proof upgrade.
