

Phase 1 — Mission Control Admin Restart Report

Generated: 2026-05-08T00:14:40Z

Result

Status: BLOCKED / NOT RESTARTED

Exact blocker: mission_control_admin_restart_required. Production Mission Control is active, but the process did not restart because systemd requires interactive admin authentication and non-interactive sudo is unavailable.

Restart Proof

Check	Result
Branch	`to-knowledge-mc`
Repo HEAD	`fc08603`
Pre-restart service status	`active`
Pre-restart MainPID	`2121865`

Dirty Worktree Notes

Existing parked artifacts remain untracked and were not staged:

- `?? public/Voice-Biometrics-Executive-Report.pdf`
- `?? public/lu-ai-collab-v2.mp4`

Security / Governance Confirmation

- No secrets, tokens, auth files, API keys, or .env values were printed.
- No .env file was modified.
- No auth policy was weakened or bypassed.
- No external writes, Zapier writes, HeyGen generation, SMB/Fork 2, Farmer execution, email send, Drive upload, OneDrive upload, or Telegram attachment send occurred.
- OpenClaw+ naming remains correct; opencloud-docs-farmer.service appears only as a literal legacy systemd service name when needed.

Phase 1 Decision

Phase 1 remains BLOCKED until an admin/operator completes the interactive restart and the PID/timestamp change is proven.
