

day-03-pi-100-closure

Day 03 â Pi 100% Closure

Date: 2026-05-09

Branch: to-knowledge-mc

Status: DEVELOPER-SIDE CLOSED

Blocker classification: NONE

Executive Summary

Day 03 closed Pi as a live in-process Mission Control shadow dispatcher. Pi is not an executor, not a commander, and not a write-capable agent. Its role is now explicit and proven: advisory route optimization and policy-aware recommendations through Gateway, with Agent Zero remaining commander.

Pi now has an authenticated recommendation route, a canonical proof packet, an owner-visible audit event for each recommendation, and Agent Hub truth updated from â pending runtime not provenâ to â read-only advisory dispatcher.â

What Changed

- Added canonical Pi status fields:
 - 'canonical_status=LIVE'
 - 'blocker_class=NONE'
 - 'proof_packet'
 - 'advisory_result_proven=true'
- Added authenticated recommendation support to 'POST /api/bridge/pi/status'.
- Added safe recommendation audit event output:
 - 'pi.dispatcher.recommendation.generated'
- Updated Agent Hub so Pi appears as:
 - 'status=read_only'
 - 'live_interface_proven=true'
 - 'blocked_reason=null'
- Removed stale Pi blocker labels that made the proven in-process dispatcher look unavailable.
- Added/updated tests proving Pi cannot execute, write, bypass Gateway, or replace Agent Zero.

Files Changed

- 'src/app/api/bridge/pi/status/route.ts'
- 'src/lib/gateway-pi-dispatcher.ts'
- 'src/lib/gateway-pi-dispatcher.test.ts'
- 'src/lib/gateway-agent-hub.ts'
- 'src/lib/gateway-agent-hub.test.ts'
- 'src/lib/gateway-model.ts'

Routes / Endpoints Changed

- 'GET /api/bridge/pi/status'
 - Returns canonical live shadow-dispatcher status and proof packet.
- 'POST /api/bridge/pi/status'
 - Accepts an 'owner_request'.
 - Returns a read-only Pi route recommendation.
 - Returns a safe audit event object.
 - Does not execute tools, write data, or call external services.

Runtime Proof

Local production-style standalone server was run on '127.0.0.1:3337' with a temporary runtime API key.

Unauthenticated proof:

- 'GET /api/bridge/pi/status' returned '401'.

- '/login' returned '200'.

Authenticated status proof:

- 'GET /api/bridge/pi/status' returned '200'.

- Pi status:

- 'canonical_status=LIVE'
- 'blocker_class=NONE'
- 'status=shadow_live'
- 'runtime.mode=mission_control_in_process_shadow'
- 'runtime.sdk_mode=true'
- 'runtime.public_exposure=false'
- 'runtime.blocker=advisory_only_no_execution_authority'
- 'advisory_result_proven=true'
- 'execution_enabled=false'
- 'writes_enabled=false'
- 'proof_packet.result=LIVE'

Authenticated recommendation proof:

- Web research request:

- target 'space_agent'
- policy 'allowed'

- Firecrawl request:

- target 'space_agent'
- policy 'missing_credential'
- blocker 'firecrawl_credential_required'

- YouTube request:

- target 'space_agent'
- policy 'allowed'

- Workflow design request:

- target 'hermes'
- blocker 'hermes_degraded_or_pending_live_proof'

- Workforce task request:

- target 'paperclip'
- blocker 'paperclip_task_write_requires_bridge_session'

- OpenClaw+ runtime execution request:

- target 'openclaw_plus'
- blocker 'openclaw_runtime_execution_requires_bridge_session'

- Delivery request:

- target 'delivery_adapter'
- blocker 'delivery_adapter_requires_bridge_session_and_configured_connector'

- Unknown connector request:

- target 'blocked'
- blocker 'unknown_connector_not_registered'

Every recommendation returned:

- 'execution_enabled=false'
- 'writes_enabled=false'
- 'audit_event=pi.dispatcher.recommendation.generated'

Agent Hub proof:

- 'GET /api/gateway/agent-hub/status' returned '200'.

- Pi card data:

- 'status=read_only'
- 'blocked_reason=null'
- 'execution_enabled=false'
- 'write_enabled=false'
- 'live_interface_proven=true'

Tests And Validation

- 'git diff --check': PASS
- 'pnpm run typecheck': PASS
- 'pnpm run build': PASS
- 'pnpm test src/lib/gateway-pi-dispatcher.test.ts src/lib/gateway-agent-hub.test.ts src/lib/gateway-model.test.ts src/lib/gateway-route-auth.test.ts': PASS, 22 tests
- 'pnpm test': PASS, 138 files / 1256 tests
- 'node scripts/check-protected-file-invariants.mjs': PASS
- staged secret scan: PASS
- '.env' diff check: clean

Safety Confirmation

- No '.env' edits.
- No secrets printed.
- No auth weakening.
- No public local exposure.
- No external writes.
- No tool execution enabled.
- No fake done.
- No fake sent/uploaded.
- Agent Zero remains commander.
- Pi remains advisory only.
- Paperclip remains before OpenClaw+ in the operating chain.

Blockers

No developer-side blocker remains for Pi's defined role.

Important limitation:

- Pi has no execution authority by design.
- Pi cannot write, call tools, bypass Gateway, or replace Agent Zero.
- Protected actions still require Agent Zero/Gateway plus Bridge Session scope and registered adapters.

Commit / Push

Code commit:

- 'ca84d50a3094946df04c0afbec3040460443cc48'
- Message: 'feat(pi): prove shadow dispatcher recommendations'
- Push: 'origin/to-knowledge-mc' updated successfully.

Rollback:

```
""bash
git revert ca84d50a3094946df04c0afbec3040460443cc48
""
```

Next Day Started

Day 04 â Paperclip 100% Closure has started automatically.
