

Day 45 - MCP UI Page

Date: 2026-05-09

Lane: MCP UI Page

Status: DEVELOPER-SIDE CLOSED

Blocker class: SERVICE_DOWN

Summary

Day 45 closes the MCP owner-facing UI truth gap. The backend MCP registry already reports a canonical blocked/service-down state when no MCP servers are discoverable from the Mission Control runtime. The UI still had stale connected language and a Tony-era visibility check. This work removes those false active claims and wires the UI to the canonical MCP registry/tool contract.

This is not MCP runtime GO. The runtime blocker remains:

'claude_mcp_discovery_unavailable: spawn claude ENOENT'

What Changed

Files changed:

- 'public/designer-mission-control/src/replicas/MCPToolsPage.jsx'
- 'src/components/agent-network/AgentNetworkClient.tsx'
- 'scripts/check-mcp-ui-contracts.mjs'
- 'scripts/check-mcp-status-consistency.mjs'
- 'scripts/check-mission-control-route-rendering.mjs'

Implementation:

- MCP Tools page now displays canonical 'canonical_status' and 'blocker_class'.
- Empty MCP server inventory now shows the exact current blocker instead of implying setup is live.
- MCP Tools page no longer checks 'visible_to?.tony'.
- MCP Tools page no longer displays stale setup copy or fake live tool claims.
- Agent Network MCP node no longer says 'connected' / 'schemas visible'.
- Agent Network MCP node now reports 'blocked' / 'registry blocked'.
- Added 'scripts/check-mcp-ui-contracts.mjs' so stale MCP UI truth and Tony visibility checks fail validation.
- Updated MCP consistency smoke to accept an empty inventory only when paired with canonical blocked/service-down truth and a blocker.
- Updated route rendering smoke to include the non-secret runtime API-key cookie context used by production local smokes.

Routes And UI Behavior

Routes checked:

- '/api/mcp/status'
- '/api/mcp/servers'
- '/designer-mission-control/Mission%20Control.html?page=mcp-tools'
- Mission Control route-rendering smoke across 46 routes and 8 designer pages

UI behavior:

- Owner-facing MCP page shows 'SERVICE_DOWN' when MCP discovery is unavailable.
- Owner-facing MCP page shows the current blocker.
- No MCP tools are shown as live when the server list is empty.
- Reauth/enable/disable remain owner-approval actions when rows exist.
- No tool execution is invoked by the MCP UI smoke.

Runtime Proof

Production branch: 'to-knowledge-mc'

Source commit:

'68c8f7d844599984a3d1269a6bc7ad7464694707'

Origin contains source commit: yes

Runtime restarted: yes

New Mission Control PID:

'86208'

Runtime bind:

'127.0.0.1:3337'

Runtime proof:

- '/login' returned 200.
- '/api/mcp/servers' returned 200 with:
 - 'canonical_status: SERVICE_DOWN'
 - 'blocker_class: SERVICE_DOWN'
 - 'blocker: claude_mcp_discovery_unavailable: spawn claude ENOENT'
 - 'total: 0'
 - 'writes_enabled: false'
 - 'execution_enabled: false'
 - 'no_tool_invocation: true'
- Served MCP Tools source contains canonical status/blocker fields.
- Served MCP Tools source does not contain the Tony visibility check.
- Served MCP Tools source does not contain stale 'schemas visible' or stale empty-state setup text.

Validation

Passed:

- 'git diff --check'
- 'node scripts/check-mcp-ui-contracts.mjs'
- 'node scripts/check-mcp-status-consistency.mjs http://127.0.0.1:3337'
- 'node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337'
- 'node scripts/check-protected-file-invariants.mjs'
- 'pnpm run typecheck'
- 'pnpm run build'
- 'pnpm test' - 165 files / 1342 tests
- staged secret scan
- '.env' diff check

Safety

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No MCP execution enabled.
- No fake live tool status.
- No Tony active commander or Tony visibility check added.

Remaining Blocker

MCP UI is developer-side closed, but MCP runtime remains:

'SERVICE_DOWN'

Reason:

'claude_mcp_discovery_unavailable: spawn claude ENOENT'

Owner/admin action needed:

Install or expose the approved Claude MCP CLI/runtime to the Mission Control runtime context, then rerun MCP registry and tool discovery smokes.

Rollback

Source rollback:

'git revert 68c8f7d844599984a3d1269a6bc7ad7464694707'

Next Day Started

Day 46 - Zapier Registry starts next.
