Day 94 - Agent Proof Replay 100% Closure

- Lane: Agent proof replay
- Status: DEVELOPER-SIDE CLOSED WITH TRUTHFUL EXTERNAL BLOCKERS
- Blocker class: SERVICE_DOWN / CREDENTIAL_GATED mix by lane; Day 94 blocker classification: NONE
- Started from commit: 68d4df00399467889aeaf057f455d464c3dccb9e
- Closed at: 2026-05-12T05:45:14Z

What Was Implemented

Replayed the canonical proof paths for Agent Zero, Hermes, Pi, Paperclip, OpenClaw+, and SpaceAgent without enabling execution, writes, or external writes. Generated a final multi-agent proof packet from the production proof library and verified every agent packet carries a truthful result, blocker classification, audit pointer, safe log pointer, runtime commit, and rollback command.

No production source files were changed for Day 94. The existing implementation was revalidated through proof replay, route auth checks, regression tests, route smokes, and security scans.

Routes / Endpoints Changed

None. Routes replayed and verified:

- /api/gateway/agent-hub/proof-packet
- /api/gateway/agent-hub/agents/agent-zero/health
- /api/gateway/agent-hub/agents/hermes/health
- /api/gateway/agent-hub/agents/pi-mono/health
- /api/gateway/agent-hub/agents/paperclip/health
- /api/gateway/agent-hub/agents/openclaw-plus/health
- /api/gateway/agent-hub/agents/spaceagent/health

UI Behavior

No UI code changed. Day 94 verified that agent-facing proof data remains status-contract based and does not invent live states:

- Agent Zero: CREDENTIAL_GATED
- Hermes: SERVICE_DOWN
- Pi: READY
- Paperclip: SERVICE_DOWN
- OpenClaw+: SERVICE_DOWN
- SpaceAgent: CREDENTIAL_GATED

Service / Runtime Behavior

Final proof packet:

- Artifact: runtime/day-94-agent-proof-replay/final-agent-proof-packet.json
- ok: true
- packets_total: 6
- consistency_ok: true
- consistency_issues: 0
- runtime_commit: 68d4df00399467889aeaf057f455d464c3dcc9e
- execution_enabled: false
- writes_enabled: false
- external_writes_enabled: false
- secrets_exposed: false
- raw_paths_exposed: false

Agent replay matrix:

Agent	Result	Blocker Class	Blocker
Agent Zero	CREDENTIAL_GATED	CREDENTIAL_GATED	agent_zero_external_api_key_missing
Hermes	SERVICE_DOWN	SERVICE_DOWN	hermes_not_installed
Pi	READY	NONE	NONE
Paperclip	SERVICE_DOWN	SERVICE_DOWN	paperclip_sandbox_service_not_running
OpenClaw+	SERVICE_DOWN	SERVICE_DOWN	openclaw_doctor_runtime_not_reachable
SpaceAgent	CREDENTIAL_GATED	CREDENTIAL_GATED	playwright_mcp_service_unreachable

Tests Run

- git diff --check: PASS
- .env diff check: PASS
- pnpm run typecheck: PASS
- pnpm run build: PASS
- pnpm test: PASS, 205 files / 1510 tests
- Focused agent proof replay tests: PASS, 11 files / 86 tests
- Protected route smoke: PASS, 44 routes / 0 failures
- Authenticated route smoke: OWNER_GATED, no owner session present
- Agent proof route auth check: PASS, protected routes are auth-gated without credentials
- Protected-file invariant scan: PASS
- Secret scan: PASS
- Raw exposure scan: PASS

Deploy / Restart / Smoke Result

No production deploy or persistent restart was performed because Day 94 had no source changes. A localhost-only standalone runtime was started for safe proof replay, protected route smoke, route auth proof, and scans, then stopped cleanly.

Remaining Blocker

No Day 94 developer-side blocker remains. External lane blockers are truthful and carried forward:

- CREDENTIAL_GATED: Agent Zero external API key missing
- CREDENTIAL_GATED: SpaceAgent Playwright MCP service unreachable
- SERVICE_DOWN: Hermes not installed
- SERVICE_DOWN: Paperclip sandbox service not running

- SERVICE_DOWN: OpenClaw+ doctor runtime not reachable

Exact Day 94 blocker classification: NONE.
