

day-95-connector-proof-replay

Day 95 - Connector Proof Replay 100% Closure

- Lane: Connector proof replay
- Status: DEVELOPER-SIDE CLOSED WITH TRUTHFUL EXTERNAL BLOCKERS
- Day 95 blocker classification: NONE
- Started from commit: bff57f5f8cc392d0be259d4d1a4d4359eb1dcd6d
- Closed at: 2026-05-12T05:59:19Z

What Was Implemented

Added a canonical connector proof replay packet for Telegram, AgentMail, Google Drive, OneDrive, Zapier, and HeyGen. The packet reuses the existing connector readiness/status helpers and proves the current runtime truth without sending messages, sending email, uploading files, invoking Zapier tools, or generating HeyGen media.

Added a protected read-only API route for the proof packet and wired Gateway Status to expose the proof route as an owner-facing read-only surface.

Files Changed

- src/lib/connector-proof-packet.ts
- src/lib/connector-proof-packet.test.ts
- src/app/api/bridge/connector-proof-packet/route.ts
- src/app/api/bridge/connector-proof-packet/route.test.ts
- scripts/authenticated-route-smoke-contract.mjs
- src/app/gateway/status/page.tsx
- runtime/day-95-connector-proof-replay.md
- runtime/day-95-connector-proof-replay.pdf
- runtime/day-95-connector-proof-replay/inventory.json
- runtime/day-95-connector-proof-replay/inventory.pdf
- runtime/day-95-connector-proof-replay/final-connector-proof-packet.json
- runtime/day-95-connector-proof-replay/protected-route-smoke.json
- runtime/day-95-connector-proof-replay/authenticated-route-smoke.json
- runtime/day-95-connector-proof-replay/connector-proof-route-auth-proof.json
- runtime/day-95-connector-proof-replay/protected-file-invariants.json
- runtime/day-95-connector-proof-replay/secret-scan.json
- runtime/day-95-connector-proof-replay/raw-exposure-scan.json

Routes / Endpoints Changed

- Added: /api/bridge/connector-proof-packet
- Updated authenticated route-smoke inventory to include /api/bridge/connector-proof-packet
- Updated Gateway Status page with a read-only Connector Proof route link and connector replay summary

UI Behavior

Gateway Status now exposes a Connector Proof Replay card. It states:

- proof route: /api/bridge/connector-proof-packet
- connectors: Telegram, AgentMail, Google Drive, OneDrive, Zapier, HeyGen
- writes: disabled
- generation: disabled
- uploads / sends: Bridge Session required

No approved designer mock HTML/CSS/class names were changed.

Service / Runtime Behavior

Final proof packet:

- Artifact: runtime/day-95-connector-proof-replay/final-connector-proof-packet.json

- ok: true
- connectors_total: 6
- consistency_ok: true
- consistency_issues: []
- execution_enabled: false
- writes_enabled: false
- external_writes_enabled: false
- no_telegram_send: true
- no_agentmail_send: true
- no_drive_upload: true
- no_onedrive_upload: true
- no_zapier_writes: true
- no_heygen_generation: true
- secrets_exposed: false
- raw_paths_exposed: false

Connector replay matrix:

Connector	Result	Blocker Class	Blocker
Telegram	CREDENTIAL_GATED	CREDENTIAL_GATED	telegram_report_delivery_adapter_not_configured
AgentMail	CREDENTIAL_GATED	CREDENTIAL_GATED	agentmail_credential_required
Google Drive	CREDENTIAL_GATED	CREDENTIAL_GATED	google_drive_credential_required
OneDrive	CREDENTIAL_GATED	CREDENTIAL_GATED	onedrive_credential_required
Zapier	BLOCKED	BLOCKED	MCP server zapier is not present in the Claude MCP configuration.
HeyGen	BLOCKED	BLOCKED	MCP server zapier is not present in the Claude MCP configuration.

Tests Run

- git diff --check: PASS
- .env diff check: PASS
- pnpm run typecheck: PASS
- pnpm run build: PASS
- pnpm test: PASS, 207 files / 1513 tests
- Focused connector replay tests: PASS, 13 files / 43 tests
- Artifact generator smoke: PASS, 1 file / 1 test, removed before staging
- Protected route smoke: PASS, 44 routes / 0 failures
- Authenticated route smoke: OWNER_GATED, no owner session present
- Connector proof route auth check: PASS, 8 protected connector routes require auth without credentials
- Protected-file invariant scan: PASS
- Secret scan: PASS
- Raw exposure scan: PASS

Deploy / Restart / Smoke Result

No production deploy or persistent restart was performed. A localhost-only standalone runtime was started on 127.0.0.1:3349 for route/proof smokes and then stopped cleanly. The build output includes /api/bridge/connector-proof-packet.

Proof Artifact

- runtime/day-95-connector-proof-replay/final-connector-proof-packet.json
- runtime/day-95-connector-proof-replay/connector-proof-route-auth-proof.json
- runtime/day-95-connector-proof-replay/protected-route-smoke.json
- runtime/day-95-connector-proof-replay/authenticated-route-smoke.json
- runtime/day-95-connector-proof-replay/secret-scan.json
- runtime/day-95-connector-proof-replay/raw-exposure-scan.json
- runtime/day-95-connector-proof-replay/protected-file-invariants.json
- runtime/day-95-connector-proof-replay/inventory.json

Remaining Blocker

No Day 95 developer-side blocker remains. External connector blockers are truthful and carried forward:

- CREDENTIAL_GATED: Telegram delivery adapter/owner channel not configured for current runtime
- CREDENTIAL_GATED: AgentMail credential required
- CREDENTIAL_GATED: Google Drive credential required
- CREDENTIAL_GATED: OneDrive credential required
- BLOCKED: Zapier MCP server not present in Claude MCP configuration
- BLOCKED: HeyGen unavailable because Zapier MCP server is not present

Exact Day 95 blocker classification: NONE.

Rollback Command

git revert <day-95-connector-proof-replay-commit>

Commit / Push

- Commit hash: pending at report creation
- Push result: pending at report creation

Next Day

Day 96 - Bridge Approval Proof Replay starts automatically after this Day 95 commit and push.
