

Day 04 Phase 7 â OpenClaw+ Doctor Remediation

Objective

Continue OpenClaw+ health remediation from reachable state to lower unresolved issue count, without destructive changes.

Actions Executed

1. Verified OpenClaw+ doctor endpoint is present in route map:
 - '/api/openclaw/doctor'
2. Probed local endpoint access:
 - unauthenticated call returns '401' (protected as expected).
3. Reviewed doctor/fix code surfaces:
 - 'src/app/api/openclaw/doctor/route.ts'
 - 'src/lib/openclaw-doctor.ts'
 - 'src/lib/openclaw-doctor-fix.ts'
4. Confirmed no destructive fallback actions were introduced in Day 04 code changes.

Commands Used

- 'curl http://127.0.0.1:3000/api/openclaw/doctor' (auth guard check)
- source inspection with 'rg'/'sed'

Proof

- Endpoint is reachable in app and properly protected ('401' unauthenticated).
- Day 04 build includes '/api/openclaw/doctor'.

Current Blocker

- Live doctor remediation execution requires authenticated admin path in runtime where OpenClaw+ service context and credentials are available.
- blocker: 'openclaw_doctor_admin_execution_required'

Safe-Fix Policy Confirmation

- No agent/skill/memory/report deletion performed.
- No governance modification performed.
- No '.env' mutation performed.

Owner/Admin Action Package

1. Provide authenticated admin session to OpenClaw+ doctor route.
2. Run doctor snapshot and return issue list.
3. Codex applies only safe app/runtime fixes from categorized list.
4. Re-run doctor and capture before/after unresolved counts.

Files Changed

- Report artifact only for this phase.

Tests

- Existing doctor parser/fix tests continue passing in full test suite.

Commits

- Pending Day 04 commit batch.

Rollback

- No runtime mutation performed in this phase.

No-Secrets Confirmation

- No secret values printed.
- No auth material exposed.

Updated Percentage

- OpenClaw+ health remains PARTIAL until authenticated doctor remediation run completes with measurable issue count reduction.

Exact Next Step

- Execute authenticated doctor run and apply categorized safe fixes.
