

Final Production GO Report — Mission Control / Gateway / Agent Hub

Generated: 2026-05-07 21:26:13

Executive Decision

****Final result: PARTIAL GO, not 100%.****

The production codebase, reports, Gateway APIs, route protection, SpaceAgent local-only Playwright MCP proof, YouTube transcript proof, Paperclip health proof, OpenClaw+ validation, Mini-Agent OS contracts, Brain read contracts, and full validation suites are materially stronger than the starting baseline. However, 100% is blocked by live owner-authenticated visual proof, Hermes `hermes\_called:true`, Firecrawl credential/backend proof, Paperclip owner login/session bridge, scoped Bridge Session execution, and external delivery connector proof.

Updated Percentages

System	Starting	Ending	Release State	Reason
---	---	---	---	---
Agent Zero	90%	90%	PARTIAL GO	Prior accepted `agent_zero_called:true`; no new owner-auth live prompt session available in this worker.
Hermes	42%	42%	NO-GO live	Service active, route protected, but safe live adapter still returns `hermes_safe_live_chat_adapter_not_configured`.
Gateway / Agent Hub	74%	78%	PARTIAL GO	APIs, auth rejection, build/tests, and UI redaction improved; owner-auth browser visual proof still blocked.
Pi-mono	pending	68%	PARTIAL GO / shadow	Pi is explicitly tracked as dispatcher candidate; recommendations are contract-proven, no live runtime execution.
SpaceAgent	66%	76%	PARTIAL GO	Playwright MCP local-only read-only proof and YouTube transcript proof passed; Firecrawl remains blocked.
Playwright MCP	90%	93%	GO local-only read-only	Local MCP smoke passed; interactive/authenticated actions remain Bridge Session-gated.
Firecrawl	blocked	25%	NO-GO live	Credential/backend not proven; status remains `firecrawl_credential_required`.
YouTube Research	limited	72%	PARTIAL GO	Metadata/transcript proof passed on public transcript video; production UI route still needs owner-auth smoke.
Paperclip	55%	62%	PARTIAL / DEGRADED	Health endpoint proven on Tailnet/authenticated mode; owner login/session bridge not proven.
OpenClaw+	62%	74%	PARTIAL GO	Runtime validation passed; dirty tree and report retention cleanup remain blocked by retention policy.
Mini-Agent OS	partial	78%	PARTIAL GO	Schemas/contracts/gauntlet pass; activation remains Bridge Session-gated.
Brain systems	partial	70%	PARTIAL GO	Obsidian/MemPalace/Gateway data tests pass; live owner-auth reads and writes remain gated.

| Build-Wiki / Farmer | 70% | 74% | PARTIAL GO / gated | Timer active; Run Now remains scoped to `opencloud-docs-farmer.service` and Bridge Session-gated. |

| Delivery connectors | 45% | 48% | PARTIAL / gated | Mission Control report-link contract works; Telegram, AgentMail, Drive, and OneDrive remain gated/blocked. |

| Bridge Session | partial | 68% | PARTIAL GO | Policy/contracts pass; no live scoped execution because no active Bridge Session. |

| Overall ecosystem | 86-87% | 89% | PARTIAL GO | Strong validation, but live blockers prevent GO/100%. |

Production Restart

- Mission Control restart result: PASS via approved service-manager fallback.
- Current service state: active.
- Restart timestamp: Thu 2026-05-07 20:51:22 EDT.
- Current PID: 2497760.
- Production route protection after restart: protected Gateway, Agent Hub, Agent Zero, Hermes, Playwright MCP, Paperclip, Pi, and SpaceAgent routes returned 401 without auth.

What Is Live

- Mission Control service active.
- Gateway / Agent Hub backend routes exist and reject unauthenticated requests.
- Agent Zero is still the commander track; prior accepted production test-chat returned `agent\_zero\_called:true`.
- Playwright MCP is live as a local-only read-only browser automation tool under SpaceAgent.
- SpaceAgent read-only Playwright MCP research proof passed against a public website.
- YouTube public metadata/transcript proof passed without downloading video.
- Paperclip health endpoint responds in authenticated/Tailnet mode.
- ClaudeClaw/OpenClaw+ service is active.
- Build-Wiki / Farmer timer is active; service is inactive by design until scoped run.
- Agent Zero container is running.
- Mission Control report-link delivery contract is present.

What Is Blocked

- Owner-authenticated browser visual proof: `owner\_authenticated\_browser\_session\_required`.
- Hermes live adapter: `hermes\_safe\_live\_chat\_adapter\_not\_configured`.
- Agent Zero to Hermes live collaboration: blocked by Hermes live adapter.
- Firecrawl: `firecrawl\_credential\_required`.
- Paperclip owner login/session bridge: `paperclip\_owner\_session\_required`.
- Telegram PDF attachment: `no\_approved\_telegram\_document\_attachment\_route`.
- AgentMail send: Bridge Session and configured adapter required.
- Google Drive upload: `google\_drive\_upload\_connector\_not\_configured`.

- OneDrive upload: `onedrive\_upload\_connector\_not\_configured`.
- Build-Wiki Run Now: `active\_bridge\_session\_required`.
- API response redaction: broad audit still required for internal server constants.
- ClaudeClaw/OpenClaw+ parked cleanup: owner retention policy required.

Routes Tested

Unauthenticated protection returned 401 for:

- `/api/gateway/status`
- `/api/gateway/agent-hub/status`
- `/api/gateway/nodes/pi-mono`
- `/api/gateway/nodes/space-agent`
- `/api/gateway/nodes/paperclip`
- `/api/bridge/agent-zero/status`
- `/api/bridge/hermes/status`
- `/api/bridge/playwright-mcp/status`
- `/api/bridge/paperclip/status`

Other route proof is documented in phase reports 1 through 19.

UI Surfaces

- Gateway / Agent Hub production route builds successfully.
- Paperclip route builds successfully.
- SpaceAgent route builds successfully.
- Browser Automation section model shows Playwright MCP as local-only connected, Firecrawl blocked, YouTube limited.
- Interactive browser actions are Bridge Session-gated.
- Four owner-facing raw path/config strings were redacted in Phase 17.
- Owner-authenticated visual proof still requires a live owner/admin browser session.

Agent Breakdown

Agent Zero

- Role: Commander.
- State: PARTIAL GO.
- Proof: prior accepted `agent\_zero\_called:true`; route protection remains correct.
- Blocker: owner-authenticated prompt gauntlet still needs a live owner/admin session.

Hermes

- Role: Lieutenant / skill and workflow builder.
- State: NO-GO live.
- Proof: service active and route protected.
- Blocker: safe no-tool/no-write live adapter not configured; do not claim `hermes\_called:true`.

Pi-mono

- Role: Dispatcher / route optimizer candidate.
- State: PARTIAL GO / shadow only.
- Proof: Pi route recommendation contracts and 15 tests passed; report committed.
- Blocker: no standalone Pi runtime/session proven; Pi cannot execute.

SpaceAgent

- Role: Browser / Firecrawl / YouTube research specialist.
- State: PARTIAL GO.
- Proof: Playwright MCP local-only read-only smoke passed; YouTube transcript proof passed.
- Blockers: Firecrawl credential missing; owner-auth visual proof pending.

Paperclip

- Role: Workforce Control Plane before OpenClaw+.
- State: PARTIAL / DEGRADED.
- Proof: health endpoint returns OK in authenticated/Tailnet mode; bridge contracts pass.
- Blockers: owner login, dashboard, roster, and task queue proof need session bridge.

OpenClaw+

- Role: Runtime / skills / agents / mini-agent execution layer.
- State: PARTIAL GO.
- Proof: service active; typecheck/build/tests/design-lock/gauntlet all passed.
- Blockers: dirty tree cleanup/retention and live execution approvals.

Validation Results

Mission Control:

- `git diff --check`: PASS.
- `pnpm run typecheck`: PASS.

- `pnpm run build`: PASS.
- `pnpm test`: PASS, 133 files and 1,237 tests.

ClaudeClaw / OpenClaw+:

- `git diff --check`: PASS.
- `npm run typecheck`: PASS.
- `npm run build`: PASS.
- `npm test`: PASS, 61 files, 1,213 passed and 4 skipped.
- `npm run design-lock:verify`: PASS.
- `npm run gauntlet`: PASS.

Commits Pushed

- `5671789` — production restart proof
- `6faedd7` — owner browser visual proof blocker
- `4923474` — Hermes live adapter blocker
- `f2c1497` — Agent Zero/Hermes collaboration blocker

- `476e356` — Firecrawl credential blocker
- `4fa91f3` — YouTube transcript proof
- `ab5b860` — SpaceAgent live read-only research proof
- `e6b5dba` — Paperclip service health
- `734817a` — Paperclip Codex/Claude auth separation
- `6dbcd9a` — OpenClaw+ runtime health proof
- `e4cd469` — Mini-Agent bridge proof
- `5d79839` — Build-Wiki / Farmer gated proof
- `84272dc` — Delivery connector blockers
- `ae01558` — Bridge Session execution blocker
- `fc59bfd` — Pi shadow dispatcher proof
- `8a25af3` — Brain read adapter proof
- `e24a7af` — owner-facing runtime path redaction fixes
- `df1b0af` — parked artifact classification
- `fa562e7` — full validation proof

Final report commit will be appended after this file is committed.

Rollback Commands

For the small UI redaction code patch only:

```
git revert e24a7af
```

For report-only commits, revert individual documentation commits as needed. For a full rollback of this production-proof packet, revert the pushed commit range from `5671789` through the final report commit, then restart Mission Control through the approved service-manager path.

Required Next Steps

1. Provide or establish an owner-authenticated browser session for visual proof.
2. Build/configure the safe Hermes no-tool/no-write live adapter until `hermes\_called:true` is real.
3. Configure Firecrawl credential/backend if Firecrawl should move to GO.
4. Complete Paperclip owner login/session bridge.
5. Open a scoped Bridge Session for one approved execution proof.
6. Configure Telegram/AgentMail/Drive/OneDrive delivery adapters or keep them explicitly blocked.
7. Run broad API response redaction pass for remaining internal server path constants.
8. Approve a retention policy before ClaudeClaw/OpenClaw+ parked artifact cleanup.

No-Secrets Confirmation

No secrets, API keys, auth files, token values, passwords, or ``.env`` values were printed or committed. No ``.env`` file was modified. No external writes, Zapier writes, HeyGen generation, SMB/Fork 2, public local service exposure, or external farmer execution occurred.
