

day-46-zapier-registry

Day 46 - Zapier Registry

Date: 2026-05-10T00:04:33Z

Status: DEVELOPER-SIDE CLOSED

Blocker class: BLOCKED

Exact blocker: MCP server zapier is not present in the Claude MCP configuration.

This is not GO. The developer-side registry contract is implemented, tested, pushed, and runtime -proven, but live Zapier tool discovery remains blocked because the Zapier MCP server is not configured in the current runtime.

Scope

Day 46 closed the Zapier registry/read-only discovery lane. The work does not enable Zapier writes, does not execute Zapier actions, and does not claim connected tools when the inventory is not visible.

Implemented

- Added canonical Zapier registry fields: 'canonical_status', 'blocker_class', 'owner_status', read/write/unknown tool counts, Bridge requirement, approval requirement, and no-write/no-execution flags.
- Wired legacy '/api/zapier/status' to the same canonical bridge-backed truth as '/api/bridge/zapier/status'.
- Kept '/api/zapier/tools' and bridge Zapier tool routes read-only and exact-blocked when the Zapier MCP server is missing.
- Updated the Zapier Mission Control page to fetch '/api/bridge/zapier/status' and '/api/bridge/zapier/tools'.
- Replaced fake/legacy UI assumptions with exact canonical status and blocker display.
- Added a Zapier registry contract smoke script.
- Added Zapier bridge tests and updated downstream Drive/OneDrive tests for the expanded registry contract.

Files Changed

- 'src/lib/zapier-tool-bridge.ts'
- 'src/lib/zapier-tool-bridge.test.ts'
- 'src/app/api/zapier/[...path]/route.ts'
- 'public/designer-mission-control/src/replicas/ZapierPage.jsx'
- 'scripts/check-zapier-registry-contracts.mjs'
- 'scripts/check-connector-action-contracts.mjs'
- 'src/lib/agent-zero-google-drive-delivery.test.ts'
- 'src/lib/agent-zero-onedrive-delivery.test.ts'

Routes Changed

- 'GET /api/bridge/zapier/status'
- 'GET /api/bridge/zapier/tools'
- 'GET /api/bridge/zapier/tools/search'
- 'GET /api/zapier/status'
- 'GET /api/zapier/tools'

UI Behavior

- Zapier page now displays canonical owner-facing status.
- Empty inventory shows the exact blocker instead of pretending tools are available.
- Write/execution controls remain locked behind Bridge Session and owner approval.
- The UI uses bridge status/tool endpoints and no longer depends on legacy tool field names.

Runtime Proof

Runtime base: 'http://127.0.0.1:3337'

Runtime PID: '89509'

Restart timestamp: 'Sat May 9 20:02:22 2026'

'/login' returned '200'.

Zapier proof routes returned:

```
| Route | HTTP | Canonical status | Blocker | Writes | Execution |
| --- | --- | --- | --- | --- | --- |
| '/api/bridge/zapier/status' | 200 | BLOCKED | MCP server zapier is not present in the Claude M
CP configuration. | false | false |
| '/api/bridge/zapier/tools' | 200 | BLOCKED | MCP server zapier is not present in the Claude MC
P configuration. | false | false |
| '/api/bridge/zapier/tools/search?q=heygen' | 200 | BLOCKED | MCP server zapier is not present
in the Claude MCP configuration. | false | false |
| '/api/zapier/status' | 200 | BLOCKED | MCP server zapier is not present in the Claude MCP conf
iguration. | false | false |
| '/api/zapier/tools' | 200 | BLOCKED | MCP server zapier is not present in the Claude MCP confi
guration. | false | false |
```

Validation

- 'git diff --check': passed.
- 'pnpm run typecheck': passed.
- 'pnpm run build': passed.
- 'pnpm test': passed, 166 files / 1344 tests.
- 'node scripts/check-zapier-registry-contracts.mjs http://127.0.0.1:3337': passed.
- 'node scripts/check-connector-action-contracts.mjs http://127.0.0.1:3337': passed.
- 'node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337': passed, 46 rou
tes / 8 designer pages.
- 'node scripts/check-protected-file-invariants.mjs': passed.
- Staged secret scan: passed.
- '.env' diff check: clean.

Commits

- Source implementation: '5661b4889ed5f1c889c65ccd36781df2da13dc40'
- Contract-script correction: '26ea8766eb55c5311706b881fe8a83bb6b2fb4ac'
- Push result: pushed to 'origin/to-knowledge-mc'.

Rollback

```
""bash
git revert 26ea8766eb55c5311706b881fe8a83bb6b2fb4ac
git revert 5661b4889ed5f1c889c65ccd36781df2da13dc40
""
```

Safety

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No Zapier writes enabled.
- No Zapier execution enabled.
- No fake tool inventory claimed.

Next Day

Day 47 starts next: Zapier no-write guard. The focus is to prove every Zapier write/action path remains blocked unless exact owner approval and Bridge Session scope exist.
