Executive Result

Paperclip co-worker/task orchestration is ****PARTIAL GO**** in dry-run mode.

Mission Control can expose Paperclip task, proposal, dispatcher, research-task, and workforce-flow route contracts. The routes correctly refuse real issue creation, work-product storage, and task execution until Paperclip auth/session bridging, write adapters, Bridge Session scope, and owner-approved policy are configured.

Production Route Proof

Route	Method	Result	Meaning
--- --- --- ---			
/api/bridge/paperclip/tasks	GET	authenticated 200	Read-only task route contract is visible.
/api/bridge/paperclip/tasks	GET	unauthenticated 401	Protected route blocks unauthenticated access.
/api/bridge/paperclip/tasks	POST	authenticated 503	Task creation blocked because Paperclip auth/session bridge is not configured.
/api/bridge/paperclip/workforce-flow	GET	authenticated 200	Workforce flow route contract is visible.
/api/bridge/paperclip/workforce-flow	POST	authenticated 503	Dry-run flow returns missing credential blocker; no issue/work product stored.
/api/bridge/paperclip/test-chat	POST	authenticated 503	Safe test-task adapter not configured; no task created.
/api/bridge/paperclip/proposals	POST	authenticated 409	Hermes proposal handoff is draft-only and storage-blocked.
/api/bridge/paperclip/dispatcher-recommendations	POST	authenticated 503	Pi recommendation stays advisory and storage-blocked.
/api/bridge/paperclip/research-tasks	POST	authenticated 409	SpaceAgent research packet handoff remains safe and storage-blocked.

Co-Worker Flow Truth

Check	Result
--- ---	
Paperclip can be seen by Gateway	yes
Agent Zero can route a task request to Paperclip contract	yes, dry-run only
Hermes can draft a proposal for Paperclip	yes, draft-only
Pi can recommend Paperclip routes	yes, advisory/shadow only
SpaceAgent can appear as research worker	yes, safe Research Packet handoff only
Paperclip creates real issue	no
Paperclip stores real work product	no
Paperclip executes worker task	no

| External write occurred | no |
| Bridge Session required for writes | yes |

Blocked Actions

Action	Current Decision	Blocker
Create Paperclip issue/task	blocked	paperclip_auth_required_or_not_configured
Store Paperclip work product	blocked	paperclip_auth_required_or_not_configured
Activate co-worker execution	blocked	active Bridge Session and approved write adapter required
Store Hermes proposal in Paperclip	blocked	Paperclip storage auth/session bridge missing
Store Pi dispatcher recommendation	blocked	Paperclip storage auth/session bridge missing
Store SpaceAgent research issue	blocked	Paperclip storage auth/session bridge missing

Safety Confirmation

- No Paperclip issue was created.
- No Paperclip work product was stored.
- No co-worker or mini-agent was activated.
- No external write was executed.
- No emails, Drive uploads, Zapier writes, HeyGen generations, SMB/Fork 2, or farmer runs occurred.
- No secrets were printed or committed.
- No .env changes were made.
- Paperclip remains behind Gateway and cannot bypass Agent Zero or Bridge Session policy.

Completion Estimate

Component	Percent	Status
Task route contract	80%	read-only route works
Proposal route contract	75%	draft-only route works
Dispatcher route contract	70%	Pi shadow recommendation works
Research task route contract	70%	SpaceAgent handoff dry-run works
Real Paperclip issue creation	0%	blocked until auth/session/write adapter
Real work-product storage	0%	blocked until auth/session/write adapter
Co-worker execution	0%	blocked until Bridge Session and runtime adapter
Paperclip co-worker phase	48%	PARTIAL GO

Exact Next Step

Configure a safe Paperclip auth/session bridge for read-only companies, agents, issues, and work products first. After read-only listings pass, add a Bridge Session-gated write adapter for dry-run issue/work-product storage. Do not enable real worker execution until those checks pass.

Final Decision

Paperclip co-worker and work product phase: ****PARTIAL GO****.

The contracts and policy gates are present and safe. Real creation/storage/execution remains intentionally blocked.
