

Day 09 - Telegram Owner Command Lane 100% Closure

Date: 2026-05-10

Branch: to-knowledge-mc

Lane: Telegram owner command

Status: CREDENTIAL_GATED

Blocker class: CREDENTIAL_GATED

Objective

Close the developer-side Telegram owner command lane without keeping Tony active and without pretending Telegram send/voice proof is live.

The correct active command structure is:

Owner -> Gateway / Nucleus -> Agent Zero / Pi / Hermes -> Paperclip -> OpenClaw+ -> specialists / tools / reports / approvals

Safety

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No Telegram bot token printed.
- No Telegram send executed.
- No fake approval created.
- No fake delivery status.
- No Tony active commander path.

Runtime Proof

Authenticated with runtime API key context.

GET '/api/bridge/agent-zero/telegram/status'

Result:

- HTTP 200
- 'provider': 'telegram'
- 'mode': 'agent_zero_telegram_delivery_adapter'
- 'status': 'blocked'
- 'canonical_status': 'CREDENTIAL_GATED'
- 'blocker_class': 'CREDENTIAL_GATED'
- 'blocked_reason': 'telegram_report_delivery_adapter_not_configured'
- 'connector_configured': 'false'
- 'credential_present': 'false'
- 'owner_channel_configured': 'false'
- 'execution_enabled': 'false'
- 'writes_enabled': 'false'
- 'bridge_session_required': 'true'
- 'active_commander': 'agent_zero'
- 'owner_command_route': 'agent_zero'
- 'tony_active': 'false'
- 'inbound_owner_validation_model': 'owner_chat_id_match_required'
- missing credential names only:
 - 'TELEGRAM_BOT_TOKEN'
 - 'AGENT_ZERO_OWNER_TELEGRAM_CHAT_ID'

GET '/api/bridge/telegram-approval-preview'

Result:

- HTTP 200
- 'active_commander': 'agent_zero'

- 'owner_command_route': 'agent_zero'
- 'tony_active': 'false'
- 'no_execution_enabled': 'true'
- 'no_persistence_enabled': 'true'
- 'no_telegram_send_enabled': 'true'
- 'approval_request_created': 'false'

Test Results

Passed:

- 'pnpm exec vitest run src/lib/agent-zero-telegram-delivery.test.ts src/lib/agent-zero-report-delivery.test.ts src/lib/agent-zero-bridge.test.ts src/lib/gateway-events.test.ts'

Test totals:

- Targeted Telegram/Agent Zero tests: 4 files / 25 tests passed.

Recent full-suite gate from the current runtime workstream:

- 'git diff --check': passed
- 'pnpm run typecheck': passed
- 'pnpm run build': passed
- 'pnpm test': passed, 171 files / 1357 tests
- Route rendering smoke: passed
- Protected-file invariant scan: passed

Current Blockers

Exact blockers:

- 'telegram_report_delivery_adapter_not_configured'
- Missing 'TELEGRAM_BOT_TOKEN'
- Missing 'AGENT_ZERO_OWNER_TELEGRAM_CHAT_ID'

Blocker classification:

- CREDENTIAL_GATED

Owner/admin action package:

1. Provide Telegram bot token through the approved secret path.
2. Provide the owner Telegram chat id through the approved secret path.
3. Restart Mission Control after credential sync.
4. Re-run 'GET /api/bridge/agent-zero/telegram/status'.
5. Only after the route is configured, run owner-channel proof.
6. Telegram PDF attachment and approval sends remain Bridge-gated and must not fake delivery.

Jarvis voice-note note:

- This Mission Control lane proves the Agent Zero Telegram owner-command adapter and approval preview state.
- It does not prove the separate Jarvis Telegram voice-note STT service.
- Live Jarvis voice-note proof remains owner/service gated unless the Jarvis bot service, audio download, and STT provider are available to this runtime.

Tony Active Status

Tony is not active in this Mission Control Telegram lane.

Proved values:

- 'active_commander': 'agent_zero'
- 'owner_command_route': 'agent_zero'
- 'tony_active': 'false'

Rollback

```
""bash
git revert <day09_commit_sha>
""
```

Closeout

Day 09 Telegram owner-command lane is developer-side closed as CREDENTIAL_GATED.

Next day automatically started:

- Day 10 - Bridge Session approvals 100% Closure
