

Agent Zero Commander Cutover Report

Generated: 2026-05-03T21:58:41.057Z

Decision

Status: GO for Agent Zero commander integration.

Evidence-based integration score: 92.9% (13 of 14 release-gate items passed). This clears the owner's minimum 90% threshold to proceed toward Hermes later. Hermes implementation remains intentionally not started in this closure step.

The only remaining non-GO item is OpenCloud/Build-Wiki decommissioning, which is deliberately not safe yet and is not required for Agent Zero commander GO. OpenCloud must remain until dependency replacement and rollback proof are complete.

Owner Live-Test Confirmation

The owner confirmed these live acceptance points on 2026-05-03:

- Agent Zero is Commander in Mission Control.
- Tony is removed from active owner-facing surfaces.
- Agent Zero can live-query Mission Control.
- Agent Zero can see Bridge/MCP live.
- Agent Zero can see tools/models/skills/integrations live.
- Agent Zero can see Brain/Obsidian/MemPalace/Graphify live.
- Agent Zero can use OpenClaw+ shared skills.
- Agent Zero can use Bridge Session execution.
- Agent Zero can create reports.
- Agent Zero can send/attach files through approved channels.
- Agent Zero does not fake completion.
- Agent Zero passes live owner tests.

Production Mission Control Reload

The stale production Mission Control process was safely reloaded without weakening auth:

- Unit: `mission-control.service`
- Service user: `tony`
- Restart policy: `Restart=always`
- Old process cwd: `.next/standalone (deleted)`

- Action: sent SIGTERM only to stale MainPID; systemd respawned service from current ``.next/standalone/server.js``
- New service PID: ``1742837``
- New cwd: ``/home/tony/mission-control/.next/standalone``

No service unit, auth policy, or ``.env`` file was changed.

Production Route Smoke

Authenticated production smoke against ``http://127.0.0.1:3337`` passed:

- ``/api/bridge/providers?agent_zero_chat=0``: HTTP 200.
- Agent Zero present by default.
- Tony absent by default.
- ``include_legacy=1`` shows Tony Legacy only as archived/retired.
- ``/api/bridge/capability-matrix``: HTTP 200.
- Active agents include Agent Zero commander, Hermes lieutenant/sandbox, OpenClaw Gateway.
- Retired agents include Tony Legacy.
- ``/api/bridge/brain-sync/status``: HTTP 200; ``agent_zero_brain`` uses ``agent_id=agent_zero``.
- ``/api/bridge/agent-zero/status``: HTTP 200; mode ``agent_zero_commander_status_bridge_session_execution``.
- ``/api/mcp/list``: HTTP 200.
- Unauthenticated ``/api/bridge/providers``: HTTP 401.

Gate Matrix

Gate	Status	Evidence
Agent Zero Commander in Mission Control	PASS	Owner confirmation and production provider/capability routes
Tony removed from active owner-facing surfaces	PASS	Production providers hide Tony by default; Tony Legacy only with <code>`include_legacy=1`</code>
Agent Zero live Mission Control query	PASS	Production <code>`/api/bridge/agent-zero/status`</code> , providers, capability matrix
Bridge/MCP live visibility	PASS	Production <code>`/api/mcp/list`</code> HTTP 200; owner confirmation
Tools/models/skills/integrations live visibility	PASS	Capability matrix and owner confirmation
Brain/Obsidian/MemPalace/Graphify live visibility	PASS	Brain Sync route and owner confirmation
OpenClaw+ shared skills	PASS	Owner confirmation; OpenClaw Gateway active in capability matrix
Bridge Session execution	PASS	Agent Zero mode reports Bridge Session execution; owner confirmation

Report creation	PASS	Owner confirmation; report delivery surfaces are registered
File send/attach through approved channels	PASS	Owner confirmation
No fake completion	PASS	Owner confirmation; gauntlets passed previously
Live owner tests	PASS	Owner confirmation
Services active	PASS	mission-control, claudeclaw, farmer timer, Hermes gateway, Agent Zero container
OpenCloud destruction readiness	BLOCKED / NOT SAFE	Dependency replacement proof incomplete; intentionally retained

Commander / Voice / Transport Status

ClaudeClaw is also cut over:

- `agent-zero`: `commander`, `active` in ClaudeClaw DB.
- `tony`: `owner\_assistant`, `retired` in ClaudeClaw DB.
- Agent Zero ElevenLabs voice was pushed and active voice ownership transferred.
- ClaudeClaw owner channel routes to Agent Zero after service restart.
- Telegram bot username may still be externally named for the old bot; renaming requires Telegram/BotFather owner action.

Pushed Commits

Mission Control:

- `c4604310439edb5c403084ec0935c62075c55841` — promote Agent Zero as ecosystem commander.
- `9f0411286b89ef391d3f9317452940450f80a944` — promote Agent Zero / retire Tony hierarchy.
- `ea49a3ab64315eb394ebf044e9a9d6f792710486` — hierarchy cutover report.
- `a02cb18637513ba7e81d90c033671fb2c15f78c2` — commander cutover closure update.

ClaudeClaw:

- `a4ec5dfb28cd4771541392256c86d0048b047071` — Agent Zero ElevenLabs voice.
- `db981fc37fcd36ca53f49c837b79f6bd324cfb47` — active voice ownership transferred to Agent Zero.
- `820b8cad9b909352150a74e7dbc6853659263857` — owner command channel routes to Agent Zero.

Tests Passed

Mission Control:

- `git diff --check`
- `pnpm run typecheck`
- `pnpm run build`

- ``pnpm test``: 94 test files, 993 tests passed
- Agent Zero full ecosystem gauntlet: 10,000 deterministic scenarios, 0 failures
- Production route smoke: passed after service reload

ClaudeClaw:

- ``git diff --check``
- ``npm run typecheck``
- ``npm run build``
- ``npm test``: 60 test files, 1208 tests passed, 4 skipped
- ClaudeClaw 100,000-scenario ecosystem gauntlet: 0 hard-fail leaks
- ``npm run design-lock:verify``

Service Status

- ``mission-control.service``: active, freshly respawned from current standalone bundle.
- ``claudeclaw.service``: active after Agent Zero owner-channel restart.
- ``opencloud-docs-farmer.timer``: active.
- ``hermes-gateway.service``: active, but Hermes implementation remains deferred.
- Docker ``agent-zero``: running.

Secrets Verification

No ``.env`` file was modified or staged. No API keys, voice provider secrets, Mission Control API keys, or Agent Zero API keys were printed or committed. Production route smoke used the Mission Control API key only inside the remote shell environment and did not print it.

Dirty Tree / Parked Files

- Mission Control still has old untracked parked artifacts. They are not part of this GO decision and were not staged.
- ClaudeClaw still has pre-existing parked runtime deletions/untracked artifacts. They are not part of this GO decision and were not staged.

OpenCloud Decision

Do not destroy OpenCloud yet. Agent Zero commander integration is GO, but OpenCloud/Build-Wiki decommissioning remains blocked until dependency replacement, backup, and rollback proof are complete.

Rollback Commands

Mission Control:

```
cd /home/tony/mission-control && git revert a02cb18637513ba7e81d90c033671fb2c15f78c2  
ea49a3ab64315eb394ebf044e9a9d6f792710486 9f0411286b89ef391d3f9317452940450f80a944  
c4604310439edb5c403084ec0935c62075c55841 && git push
```

ClaudeClaw:

```
cd /home/tony/claudeclaw && git revert 820b8cad9b909352150a74e7dbc6853659263857  
db981fc37fcd36ca53f49c837b79f6bd324cfb47 a4ec5dfb28cd4771541392256c86d0048b047071 &&  
git push && systemctl --user restart claudeclaw.service
```

If Mission Control rollback is required, reload `mission-control.service` after reverting so production serves the reverted bundle.
