

next-bridge-approved-execution-action-package

NEXT-1 â Bridge Approved Execution Action Package

Objective

Prepare one exact owner approval path for Bridge execution instead of repeating generic 'owner_approval_pending'.

Result

PARTIAL (action package ready; owner approval still required for live execution).

Actions Executed

1. Verified Bridge persistence tables exist:
 - 'bridge_approval_requests'
 - 'bridge_audit_events'
2. Queried latest pending approval and linked Bridge session from local Mission Control DB.
3. Defined one exact safe action scope and expected execution/audit behavior.

Proof

- 'bridge_approval_requests' row count: '1'
- 'bridge_audit_events' row count: '1'
- latest approval:
 - 'id=apr_7848d653-dee4-4d54-9e0c-ac334de2f8b7'
 - 'connector=agent_zero'
 - 'action=agent_zero.bridge_session.open'
 - 'approval_state=pending'
- linked bridge session:
 - 'id=bs_036335d2-74ff-430f-a2fa-de99258820cf'
 - 'session_state=pending_approval'
 - 'execution_enabled=0'
 - 'approval_request_id=apr_7848d653-dee4-4d54-9e0c-ac334de2f8b7'

Exact Approval Path

1. **Scope**: 'agent_zero.bridge_session.open' for one safe read-only confirmation action.
2. **Preferred safe action**: Mission Control report-link confirmation (no external write).
3. **Expected route**: 'POST /api/bridge/agent-zero/execute' with approved 'bridge_session_id'.
4. **Expected audit row**: new row in 'bridge_audit_events' for approved execution action.
5. **Expected expiration**: Bridge session expires at configured session expiry ('expires_at' in 'bridge_sessions').
6. **Outside-scope behavior**: blocked with scope/approval reason (must remain non-executable).

Owner Approval Package

1. Approve pending request ID: 'apr_7848d653-dee4-4d54-9e0c-ac334de2f8b7' through canonical owner approval channel.
2. Confirm approved session: 'bs_036335d2-74ff-430f-a2fa-de99258820cf'.
3. Notify Codex to run one scoped execution proof and audit verification immediately.

Explicit Blockers

- 'owner_approval_pending'
- 'active_bridge_session_required'

Safety Confirmations

- No SMB/Fork 2 execution.
- No Zapier writes.
- No HeyGen generation.
- No external farmers.
- No secrets printed.
- No '.env' changes.

Files Changed

- 'runtime/next-bridge-approved-execution-action-package.md'
- 'runtime/next-bridge-approved-execution-action-package.pdf'

Next Step

Run one approved scoped action immediately after owner approval and verify:

- 'accepted_for_execution=true'
- new 'bridge_audit_events' row
- session expiry enforcement
- outside-scope action blocked
