

day-47-zapier-no-write-guard

Day 47 - Zapier No-Write Guard

Date: 2026-05-09

Lane: Zapier No-Write Guard

Status: CLOSED AS BLOCKED

Blocker class: BACKEND_MISSING / OWNER_GATED

Objective

Prevent Zapier write execution unless an exact owner-approved Bridge Session scope exists. Day 47 does not enable Zapier writes.

Result

- Zapier write-like tool names are classified before any backend invocation.
- Write-like requests return a non-executing owner-approval response.
- Backend-missing read/write paths keep execution disabled.
- No approval request is created automatically.
- No Zapier write executes.
- Existing read-only registry/status behavior remains blocked because the Zapier MCP backend is not configured.

Files Changed

- 'src/app/api/zapier/[...path]/route.ts'
- 'src/lib/zapier-write-guard.ts'
- 'src/lib/zapier-write-guard.test.ts'
- 'scripts/check-zapier-no-write-guard.mjs'

API Behavior

Write-gated responses include:

- 'accepted_for_execution: false'
- 'execution_enabled: false'
- 'writes_enabled: false'
- 'no_zapier_writes: true'
- 'owner_approval_required: true'
- 'bridge_session_required: true'
- 'approval_request_created: false'
- 'required_scope: zapier.write'
- 'blocker: owner_approval_required'

Backend-missing responses include:

- 'backend_required: true'
- 'accepted_for_execution: false'
- 'execution_enabled: false'
- 'writes_enabled: false'
- 'no_zapier_writes: true'
- 'blocker: zapier_write_runner_not_configured'

Runtime Proof

Command:

```
""bash
node scripts/check-zapier-no-write-guard.mjs http://127.0.0.1:3337
""
```

Result:

- 'ok: true'
- 'checked: 6'
- 'failures: 0'

Proof artifacts:

- 'runtime/day-47-zapier-no-write-guard-proof.json'
- 'runtime/day-47-zapier-registry-contract-proof.json'

Validation

- 'git diff --check': PASS
- 'pnpm run typecheck': PASS
- 'pnpm run build': PASS
- 'pnpm test': PASS, 167 files / 1347 tests
- 'node scripts/check-protected-file-invariants.mjs': PASS
- Staged secret scan: PASS
- '.env' diff check: clean
- '/login': 200
- Route rendering smoke: PASS

Safety

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No Zapier writes.
- No external writes.
- No Bridge bypass.
- No fake sent/done state.

Runtime

- Mission Control production runtime restarted on '127.0.0.1:3337'.
- Runtime PID after restart: '98651'.
- No public local exposure added.

Commit

- Commit: '815cc7b'
- Message: 'fix(zapier): harden no-write guard'

Rollback

```
""bash
git revert 815cc7b
""
```

Remaining Blocker

Zapier remains BLOCKED until:

- Zapier MCP/backend is configured.
- Owner creates an exact Bridge Session scope for 'zapier.write'.
- A future approved write proof is run safely.
