

Gateway UI Scroll Trap Fix Report

Objective

Remove the Gateway Agent Hub scroll trap while keeping FULL v3 mock mounting intact.

Actions

1. Updated 'DesignerGatewayMockFrame' to remove viewport clipping lock.
2. Switched mount layout to a flex column with scrollable content region.
3. Kept designer HTML pages as mounted source (no mock-token rewrite).

Files Changed

- 'src/components/gateway/DesignerGatewayMockFrame.tsx'

Implementation Summary

- Replaced:
 - 'h-screen overflow-hidden'
- With:
 - 'flex h-full min-h-0 flex-col'
 - frame container 'flex-1 min-h-0 overflow-y-auto'
 - iframe 'scrolling='yes"' + explicit minimum display height

Proof

- Local validation passed:
 - 'git diff --check'
 - 'pnpm run typecheck'
 - 'pnpm run build'
 - 'pnpm test' (138 files / 1251 tests)
- Protected route smoke still returns login redirect for unauthenticated access on Gateway surfaces.

Blocker

- Owner-authenticated visual confirmation still required after deploy.

No-Secrets Confirmation

- No secrets printed.
- No auth weakening.
- No '.env' change.

Next Step

Deploy the UI fix, then run owner visual retest on '/gateway' and '/gateway/agent-hub'.
