

tony-delete-phase-1-active-inventory

Tony Delete Phase 1 - Active Inventory

Objective

Inventory every active Tony reference and classify each as delete, migrate, rename, or historical-only.

Status

PASS (inventory complete).

Actions Executed

- Searched runtime/UI/API/controller/test surfaces for 'tony', 'tony_legacy', 'tony_v2'.
- Split findings into:
 - active runtime reference,
 - owner-facing label,
 - compatibility/historical-only,
 - test fixture.

Active References Identified (actioned in next phases)

| Area | Example Locations | Classification | Required Action |

|---|---|---|---|

| Gateway role matrix and nodes | 'src/lib/gateway-model.ts' | active runtime + owner-facing | delete active Tony node |

| Agent Hub owner text | 'src/components/gateway-agent-hub/AgentHubControlCenter.tsx' | owner-facing label | remove Tony text |

| Legacy provider projection | 'src/app/api/bridge/providers/route.ts' | active route logic | remove Tony provider output |

| Capability matrix retired agent section | 'src/app/api/bridge/capability-matrix/route.ts' | owner-facing status surface | remove Tony from current-state payload |

| Agent Zero/Hermes response contracts | 'src/lib/agent-zero-bridge.ts', 'src/lib/hermes-bridge.ts' | owner-facing controller language | migrate wording to "not part of active system" |

| Report contract naming/aliases | 'src/lib/executive-reports.ts', 'src/app/api/reports/route.ts' | active report pipeline | migrate to neutral naming |

| Runtime identity fallback | 'src/lib/claudeclaw-runtime-status.ts' | active runtime identity | switch default runtime identity to Agent Zero |

Historical/Non-Active References

- Legacy historical records remain in older runtime artifacts and test prompts.
- These are not active route targets after this deletion batch.

Commands

- 'rg -n "tony|Tony|tony_legacy|tony_v2" src/app src/lib src/components'
- 'rg -n "tony|Tony|tony_legacy|tony_v2" public/designer-mission-control/src public/designer-mission-control/design/gateway'

Proof

- Inventory mapped to concrete edit targets completed.

Blockers

- None for inventory.

Tests

- Not applicable in this phase.

Services / Commits / Rollback

- No service changes in this phase.
- Commit pending later phases.

No-Secrets Confirmation

- No secret values printed.
- No auth files printed.
- No '.env' changes.

Updated Percentage

- Tony deletion lane: 20% -> 35% (inventory complete, implementation started).

Exact Next Step

- Execute active runtime removal from Gateway/Mission Control surfaces.
