

tony-delete-phase-4-voice-routing-removal

Tony Delete Phase 4 - Voice Routing Removal

Objective

Remove Tony as default runtime/voice identity and enforce Agent Zero as active runtime identity.

Status

PASS (code-level runtime identity migration complete).

Actions Executed

- Updated runtime service identity fallback mapping:
 - 'claudeclaw.service' now resolves to 'agent_zero' (not 'tony').
- Updated process-scan fallback name from 'tony' to 'agent_zero'.
- Updated service unit reverse mapping for fallback status rendering.

Files Changed

- 'src/lib/claudeclaw-runtime-status.ts'

Proof

- Runtime identity normalization no longer assigns 'tony' as default active unit identity.
- Active fallback identity is now Agent Zero.

Blockers

- External provider display metadata may still require owner-side rename:
 - 'owner_BotFather_rename_required' (if applicable to UI branding)

Tests

- Full suite passed after change ('138' files / '1250' tests).

Services / Commits / Rollback

- Service restart deferred to deploy phase.
- Commit pending final phase.

No-Secrets Confirmation

- No provider keys printed.
- No '.env' changes.
- No auth weakening.

Updated Percentage

- Tony deletion lane: 62% -> 70%.

Exact Next Step

- Migrate remaining Tony-branded controller/report contracts to Agent Zero/Gateway-neutral naming.
