

tony-delete-phase-8-regression-gauntlet

Tony Delete Phase 8 - Regression and Gauntlet

Objective

Prove no active Tony leakage in runtime behavior and guardrails.

Status

PASS (test/gauntlet evidence complete).

Actions Executed

- Ran typecheck.
- Ran production build.
- Ran full test suite (includes 10,000-scenario Agent Zero gauntlet and 1,000-scenario Paperclip routing gauntlet paths in suite output).
- Ran protected-file invariant scan.

Commands

- 'pnpm run typecheck'
- 'pnpm run build'
- 'pnpm test -- ...' (full run reached '138' test files / '1250' tests)
- 'node scripts/check-protected-file-invariants.mjs'

Proof Highlights

- 'Agent Zero full ecosystem gauntlet': '10,000' scenarios, '0' failures.
- 'Paperclip routing gauntlet': '1,000' scenarios, '0' failures.
- Updated Tony-removal expectations in bridge/hermes/gateway tests are green.

Blockers

- Live owner-auth browser screenshot confirmation still required:
 - 'owner_authenticated_browser_session_required'

Services / Commits / Rollback

- No deploy in this phase.
- Commit pending phase 9.

No-Secrets Confirmation

- Protected-file invariant scan passed.
- '.env' diff clean.
- No auth weakening introduced.

Updated Percentage

- Tony deletion lane: 88% -> 92%.

Exact Next Step

- Commit/push/deploy and run production proof smokes for active Tony removal.
