

Final Production GO Report — Mission Control / Gateway / Agent Workforce

Generated: 2026-05-07T22:53:23Z

Final Result

****Final Result:**** NOT COMPLETE / PARTIAL GO

Do ****not**** claim 100%. The current production system is working in several important read-only paths, but the full production completion target is blocked by admin restart, Hermes live adapter, owner-authenticated visual proof, Firecrawl credential/backend, YouTube transcript connector, Paperclip auth bridge, and external delivery connector setup.

Executive Summary

Agent Zero is live through the authenticated Mission Control bridge and returns ``agent_zero_called:true``. Playwright MCP is GO for local-only read-only browser automation. Gateway / Agent Hub APIs are live and protected, and the SpaceAgent Browser Automation truth model correctly shows Playwright MCP green, Firecrawl red/blocked, and YouTube yellow/limited.

The newly implemented SpaceAgent read-only browser ResearchPacket evidence path passed typecheck, build, and tests, and was pushed, but production Mission Control could not be restarted because ``systemctl restart mission-control.service`` requires interactive admin authentication. Until the restart happens, production still returns the old SpaceAgent research behavior with ``research_performed:false``.

Hermes remains NO-GO live because ``POST /api/bridge/hermes/test-chat`` returns ``hermes_called:false`` with ``hermes_safe_live_chat_adapter_not_configured``. Agent Zero can use the Mission Control Hermes collaboration contract route for planning-only handoff, but that is not the same as a live Hermes adapter.

Current Percentages

System / Project	Current %	Status	Notes
---	---	---	---
Agent Zero	91%	PARTIAL GO	Authenticated status/test-chat works and <code>`agent_zero_called:true`</code> passed. Blocked from full GO by Hermes live, delivery, and remaining production proof gaps.
Hermes	45%	NO-GO LIVE	Status route healthy, but live test-chat is blocked by <code>`hermes_safe_live_chat_adapter_not_configured`</code> .
Gateway / Agent Hub	76%	PARTIAL GO	APIs work and are auth-protected. Owner-authenticated browser visual proof still blocked.
SpaceAgent	72%	PARTIAL GO	Playwright MCP path proven; Firecrawl and YouTube remain blocked/limited. New ResearchPacket evidence code needs production restart.
Playwright MCP	92%	GO for local-only read-only	Local-only service is connected, snapshot/screenshot evidence works, public exposure false. Interactive/authenticated browsing remains Bridge Session-gated.
Firecrawl	25%	BLOCKED	Mission Control lacks credential and SDK/backend.
YouTube Research	45%	LIMITED	Schema/planning exists; live transcript connector is not proven.

| Paperclip | 48% | PARTIAL / DEGRADED | Tailnet health works; owner login and Mission Control Paperclip auth bridge remain blocked. |

| Pi Dispatcher | 55% | SHADOW / PARTIAL | Present as advisory/contract route model; no live independent dispatcher execution claimed. |

| Mini-Agent OS | 70% | READ-ONLY / PARTIAL | Registry/contracts and route exist; execution remains gated. |

| OpenClaw+ Runtime | 58% | PARTIAL / NEEDS REPAIR | Runtime is represented, but doctor route reports unhealthy state. Build-Wiki/Farmer timer is active under legacy service name. |

| Build-Wiki / Farmer | 68% | PARTIAL / SCOPED | Timer active; Run Now still requires Bridge Session and exact legacy service scope only. |

| Delivery | 52% | PARTIAL GO | Mission Control report link works; Telegram, AgentMail send, Google Drive, and OneDrive remain blocked/gated. |

| Overall Ecosystem | 85% | PARTIAL GO | Strong read-only control plane; live execution and delivery completion still blocked. |

Phase Results

| Phase | Result | Proof / Blocker |

| --- | --- | --- |

| Phase 1 – Owner-authenticated Agent Hub visual proof | PARTIAL / BLOCKED | Backend truth passes; exact blocker `owner\_authenticated\_browser\_session\_required`. |

| Phase 2 – Firecrawl credential/read-only proof | BLOCKED | `firecrawl\_credential\_required`; Mission Control process/env has no Firecrawl key and SDK is missing. |

| Phase 3 – YouTube transcript proof | LIMITED | `youtube\_transcript\_connector\_not\_proven`; no fake transcript claims. |

| Phase 4 – SpaceAgent read-only research flow | CODE-COMPLETE / PROD RESTART BLOCKED | Commit `7dba45a`; tests pass; production restart blocked by admin auth. |

| Phase 5 – Hermes safe live adapter | BLOCKED | `hermes\_safe\_live\_chat\_adapter\_not\_configured`; no fake `hermes\_called:true`. |

| Phase 6 – Agent Zero to Hermes collaboration | PARTIAL | Contract route returns planning handoff and audit; live Hermes adapter still blocked. |

| Phase 7 – Paperclip service health/login | PARTIAL / DEGRADED | Tailnet health passes; owner login and data bridge blocked. |

| Phase 8 – Paperclip Codex/Claude auth separation | PARTIAL | Auth separation policy correct; CLI/Paperclip smoke blocked. |

| Phase 9 – Delivery connector proof | PARTIAL GO | Mission Control report link works; external channels blocked/gated honestly. |

| Phase 10 – Integrated production gauntlet | NOT COMPLETE | Protected routes work; major blockers remain. |

Routes Tested

| Route | Result |

| --- | --- |

| `GET /api/gateway/status` | HTTP 200, degraded, read-only |

| `GET /api/gateway/registry` | HTTP 200, read-only |

| `GET /api/gateway/agent-hub/status` | HTTP 200, read-only |

| `GET /api/gateway/agent-hub/agents` | HTTP 200, read-only |

| `GET /api/bridge/agent-zero/status` | HTTP 200 |

```
| `POST /api/bridge/agent-zero/test-chat` | HTTP 200, `agent_zero_called:true` |
| `GET /api/bridge/hermes/status` | HTTP 200, healthy/read-only |
| `POST /api/bridge/hermes/test-chat` | HTTP 503, `hermes_called:false`, blocker
`hermes_safe_live_chat_adapter_not_configured` |
| `POST /api/bridge/agent-zero/hermes-handoff` | HTTP 200, contract handoff, no execution/write |
| `GET /api/bridge/space-agent/status` | HTTP 200, degraded/read-only |
| `GET /api/gateway/space-agent/browser/status` | HTTP 200, truthful cards |
| `POST /api/gateway/space-agent/research` | HTTP 200, but production still old behavior until restart |
| `GET /api/bridge/playwright-mcp/status` | HTTP 200, connected |
| `POST /api/bridge/playwright-mcp/smoke` | HTTP 200, passed, snapshot/screenshot available |
| `GET /api/firecrawl/status` | HTTP 200, credential required |
| `GET /api/bridge/paperclip/status` | HTTP 200, degraded/auth blocker |
| `GET /api/bridge/paperclip/agents` | HTTP 503, Paperclip auth blocker |
| `GET /api/gateway/mini-agents` | HTTP 200, read-only Mini-Agent OS |
| `GET /api/bridge/agent-zero/reports` | HTTP 200 |
| `GET /api/bridge/agent-zero/google-drive/status` | HTTP 200, blocked connector |
| `GET /api/bridge/agent-zero/onedrive/status` | HTTP 200, blocked connector |
| `GET /api/openclaw/doctor` | HTTP 200, unhealthy state reported |
```

Auth / Security Proof

Unauthenticated protected route checks returned HTTP 401 for Gateway, Agent Hub, Agent Zero, Hermes, Playwright MCP, and reports.

No external writes were executed. No Zapier writes, HeyGen generation, SMB mount/Fork 2, Farmer execution, email send, Drive upload, OneDrive upload, or Telegram attachment send occurred. No secrets, tokens, auth files, passwords, or `.env` values were printed or committed.

Services

```
| Service | Status |
| --- | --- |
| `mission-control.service` | active |
| Mission Control MainPID | `2121865` |
| Mission Control restart timestamp | `Thu 2026-05-07 18:15:50 EDT` |
| `claudeclaw.service` | active |
| `hermes-gateway.service` | active |
| `opencloud-docs-farmer.timer` | active, legacy service name only |
```

Tests Passed

Before pushing the SpaceAgent read-only ResearchPacket evidence code:

```
- `git diff --check`: pass
```

- `pnpm run typecheck`: pass
- `pnpm run build`: pass
- `pnpm test -- src/lib/space-agent-research.test.ts src/lib/space-agent-end-to-end-research-flow.test.ts src/lib/space-agent-health.test.ts`: pass; the runner executed 133 test files and 1,237 tests, all passed.
- Staged secret scans for all commits: pass
- PDF headers for generated reports: valid

Commits Pushed This Cycle

Commit	Purpose
---	---
`a5a92d4`	Phase 1 Agent Hub owner visual proof blocker report
`31ec502`	Phase 2 Firecrawl credential blocker report
`78d63f2`	Phase 3 YouTube transcript connector blocker report
`7dba45a`	SpaceAgent read-only browser ResearchPacket evidence implementation
`080fbfc`	Phase 4 SpaceAgent read-only research flow report
`1f49dde`	Phase 5 Hermes live adapter blocker report
`f5c6a90`	Phase 6 Agent Zero / Hermes collaboration proof report
`3cf9efa`	Phase 7 Paperclip service health/login blocker report
`aa3c37c`	Phase 8 Paperclip Codex/Claude auth separation blocker report
`19a41b5`	Phase 9 Delivery connector proof report

Rollback Commands

Use one revert per pushed commit to preserve history:

```

```bash
git revert a5a92d4
git revert 31ec502
git revert 78d63f2
git revert 7dba45a
git revert 080fbfc
git revert 1f49dde
git revert f5c6a90
git revert 3cf9efa
git revert aa3c37c
git revert 19a41b5
...

```

## Exact Remaining Blockers

1. `mission\_control\_admin\_restart\_required`: latest SpaceAgent code is pushed but production could not restart because interactive admin auth is required.

2. `owner\_authenticated\_browser\_session\_required`: visual proof of Gateway → Agent Hub → SpaceAgent panel still needs owner browser session.
3. `hermes\_safe\_live\_chat\_adapter\_not\_configured`: Hermes cannot be marked live GO.
4. `firecrawl\_credential\_required`: Mission Control lacks Firecrawl credential and SDK/backend.
5. `youtube\_transcript\_connector\_not\_proven`: no live transcript adapter.
6. `paperclip\_auth\_required\_or\_not\_configured`: Paperclip data bridge and owner login proof blocked.
7. `google\_drive\_upload\_connector\_not\_configured`: Drive upload blocked.
8. `onedrive\_upload\_connector\_not\_configured`: OneDrive upload blocked.
9. `no\_approved\_telegram\_document\_attachment\_route`: Telegram PDF attachment blocked.
10. `openclaw\_doctor\_unhealthy`: OpenClaw+ doctor reports unhealthy state that needs repair.
11. Parked artifacts remain untracked and intentionally untouched:  
`public/Voice-Biometrics-Executive-Report.pdf`, `public/lu-ai-collab-v2.mp4`.

## Exact Next Step

Run the approved admin restart for Mission Control, then immediately rerun:

1. `POST /api/gateway/space-agent/research` public webpage request and require `research\_performed:true` plus evidence/citation count above zero.
2. Owner-authenticated browser visual proof for Gateway → Agent Hub → SpaceAgent.
3. Hermes live adapter implementation/proof until `POST /api/bridge/hermes/test-chat` returns `hermes\_called:true` from a real safe adapter.

## Final Decision

**\*\*Agent Zero:\*\*** PARTIAL GO, 91%.

**\*\*Hermes:\*\*** NO-GO LIVE, 45%.

**\*\*Gateway / Agent Hub:\*\*** PARTIAL GO, 76%.

**\*\*SpaceAgent:\*\*** PARTIAL GO, 72%.

**\*\*Playwright MCP:\*\*** GO for local-only read-only browser automation, 92%.

**\*\*Overall:\*\*** PARTIAL GO, 85%.

This is not 100% complete yet.
