

Phase 5 — Firecrawl Read-Only Proof

Generated: 2026-05-07T23:15:28Z

Result

Status: BLOCKED

Firecrawl remains blocked with `firecrawl_credential_required` or an unproven live adapter. No Firecrawl `scrape/crawl/extract` execution was claimed.

Credential and Status Signals

```
| Check | Result |
| --- | --- |
| status payload `ok` | `True` |
| status payload `status` | `credential_required` |
| status payload `key_present` | `False` |
| status payload `sdk_loaded` | `False` |
| report process `FIRECRAWL_API_KEY` present | `False` |
| credential value printed | `false` |
```

Route Proof

```
| Route | Auth | HTTP | Key result |
| --- | --- | ---: | --- |
| `GET /api/firecrawl/status` | yes | 200 | ok=True, status=credential_required, key_present=False |
| `GET /api/gateway/space-agent/browser/status` | yes | 200 | ok=True, mode=space_agent_browser_automation_truth,
execution_enabled=False, writes_enabled=False |
| `POST /api/gateway/space-agent/research` | yes | 200 | ok=True, mode=space_agent_research_packet_planning,
blocked_reason=firecrawl_missing_credential_research_packet_can_still_use_browser_or_web_fallback_if_available,
execution_enabled=False, writes_enabled=False |
| `GET /api/firecrawl/status` | no | 401 | error=Unauthorized |
```

ResearchPacket Decision

No live Firecrawl ResearchPacket was produced. SpaceAgent can classify the request, but Firecrawl stays blocked until the credential/backend is configured and a read-only smoke passes.

Guardrails Confirmed

- No Firecrawl credential value was printed.

- No .env file was modified.
- No external write was executed.
- No Zapier write, HeyGen generation, SMB/Fork 2, farmer execution, upload, or email send occurred.
- Gateway / Agent Hub must keep Firecrawl red or blocked until credential and adapter proof pass.
- OpenClaw+ naming remains correct.

Exact Next Step

Configure Firecrawl through an approved protected secret source, restart Mission Control through admin authorization so the runtime can read it, then rerun a read-only public-page smoke. Do not paste the key into chat or commit it.
