Day 11 - Dispatcher Core 100% Closure

Date: 2026-05-10

Lane: Dispatcher Core / Canonical Agent Hub Truth

Status: DEVELOPER-SIDE CLOSED

Blocker classification: OWNER_GATED / CREDENTIAL_GATED / SERVICE_DOWN lanes remain truthful; Day 11 core dispatcher work has no developer-side blocker.

Objective

Make Mission Control / Gateway / Agent Hub use one owner-safe dispatcher truth source for the core agents:

- Agent Zero
- Hermes
- Pi
- Paperclip
- SpaceAgent
- OpenClaw+

Day 11 specifically fixes stale Agent Hub truth that made some blocked lanes look READY or partially live.

What Changed

The Agent Hub status payload no longer reports stale production truth:

- Agent Zero is now 'CREDENTIAL_GATED' until the approved Agent Zero external API key is available.
- Hermes is now service-down for standalone runtime, while preserving the earlier safe adapter proof.
- Paperclip is now service-down until the sandbox/local or Tailnet-only runtime is running.
- SpaceAgent is split honestly:
 - Playwright MCP: 'SERVICE_DOWN'
 - YouTube research: 'READ_ONLY'
 - Firecrawl: 'CREDENTIAL_GATED'
- Pi remains 'READ_ONLY' advisory dispatcher / route optimizer candidate.
- OpenClaw+ remains 'SERVICE_DOWN' until the CLI/runtime doctor is reachable.

The CloudCode backend-support agent-health helper now consumes the SpaceAgent browser automation card truth instead of copying one aggregate SpaceAgent blocker across Playwright, YouTube, and Firecrawl.

Files Changed

- 'src/app/api/gateway/agent-hub/status/route.ts'
- 'src/lib/gateway-agent-hub.ts'
- 'src/lib/gateway-agent-hub.test.ts'
- 'src/lib/gateway-cloudcode-integration.ts'
- 'src/lib/gateway-cloudcode-integration.test.ts'
- 'runtime/day-11-dispatcher-core-closure.md'
- 'runtime/day-11-dispatcher-core-closure.pdf'

Routes Changed

- 'GET /api/gateway/agent-hub/status'

The route now includes live SpaceAgent browser automation inputs:

- Playwright MCP status from the local MCP status probe.
- Firecrawl credential presence yes/no only.
- YouTube transcript connector proof status.

UI Behavior

Agent Hub and downstream detail/status consumers now receive owner-facing truth that avoids fake LIVE or fake READY states.

Current owner-facing status summary from the restarted runtime:

```
| Status | Count |
| --- | ---: |
| LIVE | 0 |
| READY | 1 |
| OWNER_GATED | 0 |
| CREDENTIAL_GATED | 2 |
| SERVICE_DOWN | 3 |
| BLOCKED | 0 |
| DISABLED | 0 |
```

Agent card truth:

```
| Agent | Status | Owner status | Blocker |
| --- | --- | --- | --- |
| Agent Zero | blocked | CREDENTIAL_GATED | 'agent_zero_external_api_key_missing' |
| Hermes | blocked | SERVICE_DOWN | 'hermes_not_installed' |
| Pi | read_only | READY | none |
| Paperclip | blocked | SERVICE_DOWN | 'paperclip_sandbox_service_not_running' |
| SpaceAgent | pending | CREDENTIAL_GATED | 'playwright_mcp_service_unreachable' plus Firecrawl credential gate |
| OpenClaw+ | blocked | SERVICE_DOWN | 'openclaw_doctor_runtime_not_reachable' |
```

SpaceAgent component truth:

```
| Component | Status | Blocker |
| --- | --- | --- |
| Playwright MCP | SERVICE_DOWN | 'playwright_mcp_service_unreachable' |
| YouTube Research | READ_ONLY | none |
| Firecrawl | CREDENTIAL_GATED | 'firecrawl_credential_required' |
```

Service / Runtime Proof

Mission Control was rebuilt and restarted locally on the production standalone bundle.

- Bind: '127.0.0.1:3337'
- PID after final restart: '71076'
- '/login': HTTP 200
- Public exposure check: only '127.0.0.1:3337' was listening.
- No '.env' change.
- No secrets printed.
- No auth weakening.

Authenticated runtime probe:

- 'GET /api/gateway/agent-hub/status': HTTP 200 with corrected production truth.
- 'GET /api/gateway/space-agent/youtube/status': 'READY', 'transcript_connector_proven=true'.

Tests And Checks

Passed:

- 'git diff --check'
- 'pnpm run typecheck'
- 'pnpm run build'
- 'pnpm test'
- 171 test files passed.

- 1359 tests passed.
- 'node scripts/check-protected-file-invariants.mjs'
- 'node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337'
- 46 routes checked.
- 8 designer pages checked.
- 0 failures.
- '.env' diff check: '0' bytes.

Targeted regression:

- 'src/lib/gateway-agent-hub.test.ts'
- 'src/lib/gateway-cloudcode-integration.test.ts'

These tests now fail if stale Agent Zero/Hermes/Paperclip/SpaceAgent fake-ready status returns.

Proof Artifact

This report and PDF are the Day 11 proof artifact:

- 'runtime/day-11-dispatcher-core-closure.md'
- 'runtime/day-11-dispatcher-core-closure.pdf'

Remaining Blockers

These are not Day 11 developer blockers; they are truthful downstream lane states:

Blocker	Class	Lane
'agent_zero_external_api_key_missing'	CREDENTIAL_GATED	Agent Zero
'hermes_not_installed'	SERVICE_DOWN	Hermes runtime
'paperclip_sandbox_service_not_running'	SERVICE_DOWN	Paperclip
'playwright_mcp_service_unreachable'	SERVICE_DOWN	SpaceAgent Playwright
'firecrawl_credential_required'	CREDENTIAL_GATED	SpaceAgent Firecrawl
'openclaw_doctor_runtime_not_reachable'	SERVICE_DOWN	OpenClaw+

Rollback

Rollback command after commit:

```
""bash
git revert <day11_dispatcher_core_commit_sha>
""
```

Commit / Push

Commit hash: pending until this report commit is created.

Push result: pending until this report commit is pushed.

Next Day Started

Day 12 - Token Governor begins next. The next lane is canonical token/budget/model enforcement with owner-safe UI state, tests, and proof.
