

NEXT-4 â Gateway UI Shell Navigation + Design Fidelity Fix

Objective

Fix the owner-reported Gateway UI defect by enforcing the accepted FULL v3 design contract exactly, while keeping production truth and no-fake status behavior.

Result

PARTIAL GO (implementation complete; owner re-test still required before GO).

Actions Completed

1. Replaced custom Gateway React page surfaces with direct FULL v3 mock mounting (no redesign layer).
2. Wired these production routes directly to the designer HTML contract:
 - '/gateway' â 'Gateway Overview.html'
 - '/gateway/routes' â 'Gateway Routes.html'
 - '/gateway/registry' â 'Gateway Registry.html'
 - '/gateway/policies' â 'Gateway Policies.html'
 - '/gateway/health' â 'Gateway Health.html'
 - '/gateway/dispatcher' â 'Dispatcher.html'
 - '/gateway/token-governor' â 'Token Governor.html'
 - '/gateway/agent-hub' â 'Agent Hub.html'
 - '/gateway/agent-hub/paperclip' â 'Paperclip.html'
 - '/gateway/bridge-session' â 'Bridge Session Flow.html'
 - '/gateway/node-detail' â 'Gateway Node Detail.html'
 - '/gateway/mobile-tablet' â 'Gateway Mobile Tablet.html'
3. Kept route compatibility behavior intact ('/agents', '/agent-network', '/gateway-parent', '/gateways', '/gateway-config' are unchanged in existing redirect logic).
4. Replaced static mock-only Agent Hub data behavior with live hydration in 'shared/agent-data.js':
 - reads '/api/gateway/agent-hub/status' using authenticated same-origin request,
 - maps live agent state to locked grammar ('green/yellow/blue/red/gray'),
 - maps live SpaceAgent Browser Automation status/cards/buttons,
 - falls back to existing mock arrays if live API is unavailable.
5. Preserved rendering code and CSS token contract in the designer pages (no class renames, no token overrides).

Commands Run

- 'git diff --check'
- 'pnpm run typecheck'
- 'pnpm run build'
- 'pnpm test'

Validation Proof

- Typecheck: PASS
- Build: PASS
- Tests: PASS ('138' files / '1251' tests)
- Local protected-route smoke (unauthenticated): PASS ('307 -> /login' for '/gateway', '/gateway/agent-hub', '/gateway/routes', '/gateway/bridge-session', '/agent-network', '/agents')
- Gateway routes present in build output:
 - '/gateway', '/gateway/routes', '/gateway/registry', '/gateway/policies', '/gateway/health', '/gateway/dispatcher', '/gateway/token-governor', '/gateway/agent-hub', '/gateway/agent-hub/paperclip'
 - plus added: '/gateway/bridge-session', '/gateway/node-detail', '/gateway/mobile-tablet'

Files Changed

- 'src/components/gateway/DesignerGatewayMockFrame.tsx'
- 'src/app/gateway/page.tsx'
- 'src/app/gateway/routes/page.tsx'
- 'src/app/gateway/registry/page.tsx'
- 'src/app/gateway/policies/page.tsx'
- 'src/app/gateway/health/page.tsx'
- 'src/app/gateway/dispatcher/page.tsx'

- 'src/app/gateway/token-governor/page.tsx'
- 'src/app/gateway/agent-hub/page.tsx'
- 'src/app/gateway/agent-hub/paperclip/page.tsx'
- 'src/app/gateway/bridge-session/page.tsx'
- 'src/app/gateway/node-detail/page.tsx'
- 'src/app/gateway/mobile-tablet/page.tsx'
- 'public/designer-mission-control/design/gateway/shared/agent-data.js'
- 'runtime/next-gateway-ui-shell-navigation-fix.md'

Security / Safety Checks

- No '.env' changes.
- No auth weakening.
- No new public local exposure introduced.
- No secrets/token values printed.
- No fake live/send/upload claims introduced.

Blockers

- Owner confirmation still required to upgrade from PARTIAL GO to GO:
 - owner must confirm the authenticated '/gateway' and '/gateway/agent-hub' now visually match FULL v3 side-by-side expectation.

Commit / Rollback

- Commit: pending (current workstream batch not committed yet).
- Planned rollback command after commit:
 - 'git revert <gateway_design_fidelity_commit_sha>'

Updated Lane Status

- Gateway owner visual lane:
 - from: 'owner_visual_proof_partial_navigation_layout_defect'
 - to: 'owner_visual_proof_partial_pending_owner_retest_on_fidelity_fix'

Exact Next Step

Deploy this batch and run owner authenticated re-test checklist against '/gateway' and '/gateway/agent-hub' for final GO/partial decision.
