

day-48-heygen-schema-readiness

Day 48 - HeyGen Schema Readiness

Date: 2026-05-10

Lane: HeyGen Schema Readiness

Status: CLOSED AS BLOCKED

Blocker class: BACKEND_MISSING

Objective

Make HeyGen payload/schema readiness visible without enabling generation. Day 48 does not run HeyGen, does not invoke Zapier tools, and does not create videos.

Result

- Added a read-only schema readiness helper for HeyGen through the existing Zapier Tool Bridge.
- Added protected endpoint: 'GET/POST /api/bridge/heygen/schema-readiness'.
- The endpoint validates schema visibility and payload shape only.
- The endpoint always returns:
 - 'accepted_for_generation: false'
 - 'execution_enabled: false'
 - 'writes_enabled: false'
 - 'no_heygen_generation: true'
 - 'no_zapier_writes: true'
 - 'bridge_session_required: true'
 - 'approval_required_for_generation: true'
- Added a small Zapier page readiness card that uses the endpoint and does not add a generate button.
- Updated the Zapier registry contract smoke to include the HeyGen readiness endpoint and UI source check.

Current Runtime Truth

HeyGen schema readiness is developer-side wired, but live schema proof is blocked because Zapier MCP is not present in the current Claude MCP configuration.

Current live result:

- 'canonical_status: BLOCKED'
- 'blocker_class: BLOCKED'
- 'blocker: MCP server zapier is not present in the Claude MCP configuration.'
- 'schema_available: false'
- 'accepted_for_generation: false'

Exact blocker classification for the day: 'BACKEND_MISSING'.

Files Changed

- 'src/lib/heygen-schema-readiness.ts'
- 'src/lib/heygen-schema-readiness.test.ts'
- 'src/app/api/bridge/heygen/schema-readiness/route.ts'
- 'src/app/api/bridge/heygen/schema-readiness/route.test.ts'
- 'scripts/check-heygen-schema-readiness.mjs'
- 'scripts/check-zapier-registry-contracts.mjs'
- 'public/designer-mission-control/src/replicas/ZapierPage.jsx'

API Behavior

Unauthenticated access:

- 'GET /api/bridge/heygen/schema-readiness' returns '401'.

Authenticated access:

- 'GET /api/bridge/heygen/schema-readiness' returns schema readiness or exact blocker.
- 'POST /api/bridge/heygen/schema-readiness' validates a payload shape and still never executes.
- Missing required fields return 'heygen_payload_missing_required_fields' when schema is visible
- .
- If schema is not visible, the endpoint returns the current Zapier MCP blocker.

UI Behavior

- Zapier page now calls '/api/bridge/heygen/schema-readiness'.
- UI shows schema visibility, selected tool, required fields, generation gate, blocker, and next action.
- No fake generate button was added.
- Generation remains Bridge-gated and disabled.

Runtime Proof

Commands:

```
""bash
node scripts/check-heygen-schema-readiness.mjs http://127.0.0.1:3337
node scripts/check-zapier-registry-contracts.mjs http://127.0.0.1:3337
node scripts/check-zapier-no-write-guard.mjs http://127.0.0.1:3337
node scripts/check-connector-action-contracts.mjs http://127.0.0.1:3337
node scripts/check-mission-control-route-rendering.mjs http://127.0.0.1:3337
""
```

Results:

- HeyGen readiness smoke: PASS, 'checked: 3', 'failures: []'
- Zapier registry contract: PASS, HeyGen readiness included
- Zapier no-write guard: PASS, 'checked: 6'
- Connector action contracts: PASS, 'checked: 6'
- Mission Control route rendering smoke: PASS, '46' routes and '8' designer pages
- '/login': '200'

Proof artifacts:

- 'runtime/day-48-heygen-schema-readiness-proof.json'
- 'runtime/day-48-zapier-registry-contract-proof.json'
- 'runtime/day-48-zapier-no-write-guard-proof.json'
- 'runtime/day-48-connector-action-contract-proof.json'

Validation

- TDD red: route/helper tests first failed on missing implementation.
- Focused tests: PASS, '2' files / '7' tests.
- 'pnpm run typecheck': PASS
- 'pnpm run build': PASS
- 'pnpm test': PASS, '174' files / '1371' tests
- 'git diff --check': PASS
- 'node scripts/check-protected-file-invariants.mjs': PASS
- '.env' diff check: clean
- Staged secret scan: run immediately before commit.

Runtime

- Mission Control standalone runtime restarted on '127.0.0.1:3337'.
- Runtime PID after restart: '9519'.
- No public local exposure added.
- No '.env' change.

Safety

- No HeyGen generation.
- No Zapier writes.
- No external writes.
- No Bridge bypass.
- No approval request was created automatically.
- No fake sent/done/live state.
- No raw local paths exposed in proof payloads.
- No secrets printed.
- No auth weakening.

Commit / Push

- Commit: recorded after this report is committed.
- Expected message: 'feat(heygen): add schema readiness guard'
- Push target: 'origin/to-knowledge-mc'

Rollback

```
""bash
git revert <day48_commit_sha>
""
```

Remaining Blocker

'BACKEND_MISSING'

HeyGen schema proof can move forward only after:

- Zapier MCP/backend is configured in the runtime.
- HeyGen appears in the Zapier MCP tool inventory.
- A future exact Bridge Session scope exists before any generation action.
