

Phase 8 - Paperclip Service and Owner Login Report

Generated: 2026-05-07T21:05:56-04:00

Result

****PARTIAL GO / SERVICE HEALTH PASSED, OWNER LOGIN PROOF BLOCKED****

Paperclip is running in sandbox/Tailnet-only mode and its health endpoint is ready. Owner login, company dashboard, roster, and task queue visual proof remain blocked because no owner-authenticated Paperclip browser session is available in this worker context.

Exact remaining blocker:

``paperclip_owner_session_required``

Service Health

Check	Result
Paperclip process	running
Tailnet API URL	http://100.116.35.95:3100
Health endpoint	200
Health status	ok
Deployment mode	authenticated
Bootstrap status	ready
Secondary port	426 on health probe
Localhost exposure	not listening on localhost
Public 0.0.0.0 exposure	not observed
Writes/task creation	not executed

Mission Control Bridge Route Protection

Unauthenticated route checks after Mission Control restart:

Route	Result	Meaning
GET /api/bridge/paperclip/status	401	protected
GET /api/bridge/paperclip/companies	401	protected
GET /api/bridge/paperclip/agents	401	protected
GET /api/bridge/paperclip/issues	401	protected
GET /api/gateway/nodes/paperclip	401	protected

Paperclip Architecture Placement

Layer	Role
Gateway / Nucleus	routing, policy, registry, audit, visibility
Agent Zero	commander
Pi	dispatcher / route optimizer candidate
Hermes	skill and workflow builder
Paperclip	Workforce Control Plane before OpenClaw+
OpenClaw+	runtime / skills / agents / mini-agent execution layer

Paperclip does not replace Agent Zero, Hermes, Pi, SpaceAgent, OpenClaw+, or existing agents.

Tests

Test	Result
src/lib/paperclip-bridge.test.ts	36 passed
src/lib/paperclip-routing-gauntlet.test.ts	2 passed
Paperclip routing gauntlet	1,000 scenarios, 0 failures
Combined focused tests	38 passed

Owner Access Status

Item	State
Owner login	blocked pending owner session
Company dashboard	not proven
Agent roster view	not proven
Task queue view	not proven
Task creation	gated; not executed
Writes	disabled unless Bridge Session and adapter are configured

Security Confirmation

- No secrets printed.
- No auth files printed.
- No `.env`` changes.
- No public Cloudflare exposure added.
- No task creation or write action executed.
- No fake owner login claim.

Updated Percentage

System	Previous	Updated
--------	----------	---------

Paperclip	55% PARTIAL / DEGRADED	62% PARTIAL GO
-----------	------------------------	----------------

Exact Next Step

Use an owner-authenticated Paperclip browser session to prove login, company dashboard, roster, and task queue. Then wire only read-only Paperclip status into Mission Control until Bridge Session write scope is approved.

Rollback

This phase changed only reports. Rollback command after commit:

```
`git revert <phase-8-commit>`
```
