Day 21 â Owner-Facing Status Language 100% Closure

Date: 2026-05-09

Branch: to-knowledge-mc

Code commit: b277980

Push result: pushed to origin/to-knowledge-mc

Status: CLOSED for developer-side Day 21 gate

Blocker class: NONE

Lane

Day 21 replaced vague implementation states with a canonical owner-facing status contract for the active Mission Control / Gateway surface.

Canonical owner statuses:

- LIVE
- READY
- OWNER_GATED
- CREDENTIAL_GATED
- SERVICE_DOWN
- BLOCKED
- DISABLED

The old internal words remain available as diagnostic fields where needed, but owner-facing API payloads now include 'owner_status' with label, summary, reason, blocker class, tone, and read/write/execute truth.

What Was Implemented

- Added 'src/lib/owner-status.ts'.
- Added canonical status descriptors with locked status vocabulary.
- Added owner-safe reason redaction for paths, auth-file names, bearer values, and secret-shaped tokens.
- Wired 'owner_status' into Agent Hub agents and supporting runtime systems.
- Added 'allowed_owner_statuses' and 'owner_status_summary' to '/api/gateway/agent-hub/status'.
- Added 'owner_status' descriptors and 'allowed_owner_statuses' to '/api/bridge/button-contracts'.
- Updated designer-mounted Agent Hub hydration to use 'owner_status.tone' and owner-facing status summaries without changing the locked FULL v3 class names or token source.

Files Changed

- 'src/lib/owner-status.ts'
- 'src/lib/owner-status.test.ts'
- 'src/lib/gateway-agent-hub.ts'
- 'src/lib/gateway-agent-hub.test.ts'
- 'src/lib/gateway-agent-hub-designer-data.test.ts'
- 'src/lib/button-contracts-route.test.ts'
- 'src/app/api/bridge/button-contracts/route.ts'
- 'public/designer-mission-control/design/gateway/shared/agent-data.js'

Routes / Endpoints Changed

- 'GET /api/gateway/agent-hub/status'
- 'GET /api/gateway/agent-hub/agents'
- 'GET /api/gateway/agent-hub/agents/:id'
- 'GET /api/gateway/agent-hub/agents/:id/health'
- 'GET /api/gateway/agent-hub/registry'
- 'GET /api/bridge/button-contracts'

UI Behavior

- Agent Hub live hydration now maps canonical owner-facing statuses to the locked designer color grammar.
- READY uses blue.
- OWNER_GATED and CREDENTIAL_GATED use yellow.
- SERVICE_DOWN and BLOCKED use red.

- DISABLED uses gray.
- LIVE uses green.
- No FULL v3 rendering classes were renamed.
- 'shared/tokens.css' remains the token source.
- No fake execution state was introduced.

Runtime Proof

Proof artifact: 'runtime/day-21-owner-status-language-proof.json'

Runtime bind:

- 127.0.0.1:3337

Runtime PID:

- 92606

Route/API proof:

- '/login' returned 200.
- Unauthenticated '/gateway' redirected to '/login'.
- Unauthenticated '/gateway/agent-hub' redirected to '/login'.
- Unauthenticated '/api/gateway/agent-hub/status' returned 401.
- Session-cookie protected '/gateway' returned 200.
- Session-cookie protected '/gateway/agent-hub' returned 200.
- Runtime-key authenticated '/api/gateway/agent-hub/status' returned 200.
- Runtime-key authenticated '/api/bridge/button-contracts' returned 200.

Agent Hub owner status proof:

- Paperclip: OWNER_GATED
- Agent Zero: READY
- Hermes: OWNER_GATED
- SpaceAgent: READY
- Pi-mono: READY
- OpenClaw+: SERVICE_DOWN

Button contract owner status proof:

- LIVE: 33
- READY: 5
- OWNER_GATED: 12
- CREDENTIAL_GATED: 9
- SERVICE_DOWN: 6
- DISABLED: 7
- BLOCKED: 0

2026-05-10 Current Runtime Revalidation

The Day 21 implementation remains valid, but the live runtime status values have changed since the original proof. Current status language proof is:

Agent Hub:

- Paperclip: SERVICE_DOWN, reason paperclip_sandbox_service_not_running
- Agent Zero: CREDENTIAL_GATED, reason agent_zero_external_api_key_missing
- Hermes: SERVICE_DOWN, reason hermes_not_installed
- SpaceAgent: CREDENTIAL_GATED, reason playwright_mcp_service_unreachable
- Pi-mono: READY, advisory-only dispatcher / route optimizer candidate
- OpenClaw+: SERVICE_DOWN, reason openclaw_doctor_runtime_not_reachable

Button contract owner status proof:

- LIVE: 35
- READY: 5
- OWNER_GATED: 13
- CREDENTIAL_GATED: 8
- SERVICE_DOWN: 7
- BLOCKED: 2

- DISABLED: 8

Revalidation commands:

- pnpm test src/lib/owner-status.test.ts src/lib/gateway-agent-hub.test.ts src/lib/gateway-agent-hub-designer-data.test.ts src/lib/button-contracts-route.test.ts: pass, 4 files / 12 tests
- Runtime-key authenticated /api/gateway/agent-hub/status: 200
- Runtime-key authenticated /api/bridge/button-contracts: 200
- Allowed owner status vocabulary remained exactly: LIVE, READY, OWNER_GATED, CREDENTIAL_GATED, SERVICE_DOWN, BLOCKED, DISABLED
- Unsafe status count: 0
- Raw local path-like reason output: false

Tests Run

- 'pnpm test src/lib/owner-status.test.ts src/lib/gateway-agent-hub.test.ts src/lib/gateway-agent-hub-designer-data.test.ts src/lib/button-contracts-route.test.ts'
 - 4 files / 12 tests passed.
- 'pnpm run typecheck'
 - passed.
- 'pnpm run build'
 - passed.
- 'pnpm test'
 - 150 files / 1306 tests passed.
- 'node scripts/check-protected-file-invariants.mjs'
 - passed.
- 'git diff --check'
 - passed.
- Staged secret scan
 - passed.
- '.env' diff check
 - clean.

Safety

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No fake Done / fake GO / fake live status.
- No raw local paths added to owner-facing payloads.
- No external writes.
- No SMB/Fork 2.
- No Zapier writes.
- No HeyGen generation.
- No external farmers.

Rollback

Rollback code commit:

```
""bash
git revert b277980
""
```

Remaining Blocker

None for Day 21 developer-side closure.

System-level blockers remain tracked in their lanes:

- OpenClaw+ runtime doctor remains SERVICE_DOWN until a reachable OpenClaw+ CLI/runtime is installed or exposed to the Mission Control runtime user.
- Paperclip remains OWNER_GATED/SERVICE_DOWN depending the active service/session proof lane.
- Bridge approved execution remains owner-approval gated until an approved scoped action executes.
- Delivery connector lanes remain gated until their credentials/session/Bridge proof gates pass.

Next Day

Day 22 â Authenticated Visual Proof starts automatically after this report commit.
