Day 06 Phase 2 â Owner Browser Proof Action Package

Objective

Resolve owner-authenticated visual proof or provide exact owner action package without blocking campaign execution.

Result

BLOCKED (owner session required), with action package prepared.

Blocker

- 'owner_authenticated_browser_session_required'

What Was Attempted

1. Verified the Gateway FULL v3 routes are currently protected and routing to '/login' when unauthenticated.
2. Confirmed automation environment does not have an owner-authenticated browser session token/cookie bound to production.
3. Prepared exact owner action package for immediate unblock.

Owner Action Package (No Secrets Needed)

Use an owner-authenticated browser session and perform the following:

URLs to Open

1. Mission Control login/start:
 - 'https://tkmc.knowledge-vs-ai.com/login'
2. Gateway:
 - 'https://tkmc.knowledge-vs-ai.com/gateway'
3. Agent Hub:
 - 'https://tkmc.knowledge-vs-ai.com/gateway/agent-hub'

Tabs/Views to Capture

From Gateway left/tab rail, capture:

1. Overview
2. Routes
3. Registry
4. Policies / Bridge
5. Health
6. Dispatcher
7. Token Governor
8. Agent Hub

Labels/Objects Expected Visible

1. 'Agent Zero' (Commander)
2. 'Hermes' (live lieutenant / planning-only)
3. 'Pi' (shadow dispatcher)
4. 'SpaceAgent' (Playwright MCP / Firecrawl / YouTube)
5. 'Paperclip' (before OpenClaw+)
6. 'OpenClaw+'
7. Delivery panel/status area
8. Bridge Session panel/status area

Quality Checks to Confirm in Screenshots

1. No fake buttons (every action is live/gated/blocked honestly).
2. No raw local filesystem paths.
3. No secret/token-like values.
4. No OpenCloud architecture label except legacy literal service naming contexts.

What Codex Will Verify Immediately After Owner Evidence Is Available

1. Card order and operating chain (Paperclip before OpenClaw+).
2. Role labels (Agent Zero commander, Hermes lieutenant, Pi shadow dispatcher).
3. SpaceAgent child capability labels (Playwright MCP, Firecrawl, YouTube).
4. Delivery and Bridge status honesty (no fake GO claims).

5. No secret/path leakage in visible UI text.

Files Changed

- 'runtime/day-06-phase-2-owner-browser-proof-action-package.md'
- 'runtime/day-06-phase-2-owner-browser-proof-action-package.pdf'

Safety Confirmation

- No secret request.
- No token request.
- No credential request.
- No auth weakening.

Updated Percentage

- Owner-browser proof remains blocked pending owner-authenticated visual evidence.
- Overall remains PARTIAL GO (low 90s).

Exact Next Step

Continue to Day 06 Phase 3: Bridge Session persistence and one approved scoped execution proof.
