Day 06 Phase 5 â Paperclip Owner Session Bridge

Objective

Move Paperclip from health-only visibility to owner-authenticated read-only dashboard/roster/task proof.

Result

BLOCKED (owner session required), with exact action package prepared.

Current Truth

- Paperclip bridge/status wiring exists in Mission Control.
- Previous verified state (Day 05): health endpoint reachable; companies/agents/issues remained auth/session blocked.
- Paperclip cannot be marked GO without owner session + read-only data proof.

Runtime and Access Constraints in This Phase

- Current active runtime auth context for protected Paperclip bridge routes is not available from automation ('401' on protected routes without owner/session auth).
- No auth bypass was attempted.

Paperclip Owner Action Package (No Secrets Needed)

URL / Access Target

- Local/Tailnet Paperclip target expected by bridge policy:
 - Local default: 'http://127.0.0.1:3100'
 - If Tailnet route is configured, use the approved Tailnet URL shown in your environment.

Owner Steps

1. Open Paperclip URL in owner-authenticated session.
2. Complete owner login.
3. Open:
 - company dashboard,
 - agent roster,
 - task queue.

What Codex Will Verify Immediately After Owner Session Exists

1. 'GET /api/bridge/paperclip/status' -> health + mode consistency.
2. 'GET /api/bridge/paperclip/companies' -> no longer session-blocked.
3. 'GET /api/bridge/paperclip/agents' -> no longer session-blocked.
4. 'GET /api/bridge/paperclip/issues' -> no longer session-blocked.
5. Paperclip remains positioned before OpenClaw+ in operator chain.
6. Writes remain blocked unless Bridge Session + adapter scope are active.

Blocker

- 'paperclip_owner_session_required'

Safety Confirmation

- No secret/token request.
- No auth file request.
- No public exposure enabled.
- No writes executed.

Files Changed

- 'runtime/day-06-phase-5-paperclip-owner-session-bridge.md'
- 'runtime/day-06-phase-5-paperclip-owner-session-bridge.pdf'

Commits

- Pending (phase report only in working tree at this point).

Rollback

- Not applicable (no source mutation in this phase).

Updated Percentage

- Paperclip remains PARTIAL until owner login and live data route proof are completed.

Exact Next Step

Proceed to Day 06 Phase 6 (Drive/OneDrive adapter path) while waiting for owner Paperclip session unblock.
