Day 06 Phase 8 â YouTube Transcript Live Proof Retry

Objective

Retry live YouTube metadata/transcript proof and promote status only if runtime evidence improves.

Result

LIMITED / BLOCKED (no fake upgrade).

Actions Executed

1. Attempted protected YouTube status and research routes on active runtime:
 - 'GET /api/gateway/space-agent/youtube/status'
 - 'POST /api/gateway/space-agent/youtube/research'
2. Captured response status and body for proof.

Evidence

- Both requests returned '401 Unauthorized' without authenticated operator/session context.
- No transcript extraction or metadata packet could be validated in this phase.

Current Classification

- YouTube remains LIMITED.
- Do not claim transcript GO.

Blockers

- 'youtube_transcript_connector_not_proven'
- 'authenticated_local_smoke_blocked'
- possibly 'owner_approval_pending' / session gating for protected live verification path

Safety Confirmation

- No video download attempted.
- No bypass of login/age/region/paywall/copyright.
- No external writes executed.

Files Changed

- 'runtime/day-06-phase-8-youtube-transcript-live-proof-retry.md'
- 'runtime/day-06-phase-8-youtube-transcript-live-proof-retry.pdf'

Updated Percentage

- YouTube unchanged (LIMITED) pending authenticated live research packet proof.

Exact Next Step

Run authenticated YouTube status/research call on one public transcript-enabled URL and verify metadata + timestamped claim output before increasing percentage.
