Day 57 â Google Drive Readiness Closure

Date: 2026-05-10

Status: DEVELOPER-SIDE CLOSED / CREDENTIAL_GATED

Lane: Google Drive readiness

Objective

Close Google Drive readiness without fake upload. The Google Drive status route must expose canonical owner-facing truth, target-folder readiness, exact required scope, and safe blocked upload behavior.

Implementation

Files changed:

- 'src/lib/agent-zero-google-drive-delivery.ts'
- 'src/lib/agent-zero-google-drive-delivery.test.ts'
- 'scripts/check-google-drive-readiness-guard.mjs'
- 'runtime/day-57-google-drive-readiness-guard-smoke.json'
- 'runtime/day-57-route-rendering-smoke.json'
- 'runtime/day-57-google-drive-readiness-closure.md'
- 'runtime/day-57-google-drive-readiness-closure.pdf'

Routes verified:

- 'GET /api/bridge/agent-zero/google-drive/status'
- 'POST /api/bridge/agent-zero/google-drive/upload-report'

Behavior added:

- Google Drive readiness now includes canonical status and blocker class.
- Status reports required scope: 'google_drive.upload'.
- Status reports target folder requirement without exposing folder/path values.
- Credential/config presence is reported as yes/no and credential names only.
- Upload connector stays disabled until a real scoped adapter exists.
- Runtime status includes 'no_upload_performed=true'.
- Upload attempts remain blocked with 'accepted_for_execution=false'.

Current runtime truth:

- 'canonical_status': 'CREDENTIAL_GATED'
- 'blocker_class': 'CREDENTIAL_GATED'
- 'blocked_reason': 'google_drive_credential_required'
- 'credential_present': 'false'
- 'required_scope': 'google_drive.upload'
- 'target_folder_required': 'true'
- 'target_folder_configured': 'false'
- 'upload_connector_configured': 'false'
- 'writes_enabled': 'false'
- 'no_upload_performed': 'true'
- 'no_fake_done': 'true'

Runtime Proof

Runtime bind:

- '127.0.0.1:3337'

Runtime PID after build/restart:

- '37598'

Google Drive readiness guard:

- Command: 'MISSION_CONTROL_API_KEY=<redacted> node scripts/check-google-drive-readiness-guard.mjs http://127.0.0.1:3337 runtime/day-57-google-drive-readiness-guard-smoke.json'
- Result: PASS
- Checked: 3
- Failures: 0

Route rendering smoke:

- First run during concurrent full test load timed out on '/api/bridge/providers'.
- Rerun after tests completed: PASS
- Routes checked: 46
- Designer pages checked: 8
- Failures: 0

Validation

Red/green test cycle:

- Initial focused test failed because Google Drive readiness did not expose 'canonical_status'.
- Implementation added canonical status, blocker class, target-folder readiness, required scope, and no-upload proof.
- Focused test passed: 'src/lib/agent-zero-google-drive-delivery.test.ts' â 3 tests.

Commands run:

- 'node --check scripts/check-google-drive-readiness-guard.mjs' â PASS
- 'pnpm exec vitest run src/lib/agent-zero-google-drive-delivery.test.ts --pool=forks --no-file-parallelism --reporter verbose' â PASS, 3 tests
- 'pnpm run typecheck' â PASS
- 'pnpm run build' â PASS
- 'pnpm test' â PASS, 181 files / 1414 tests
- 'git diff --check' â PASS
- 'node scripts/check-protected-file-invariants.mjs' â PASS
- '.env diff check' â PASS

Safety

- No '.env' changes.
- No secrets printed.
- No auth weakening.
- No public local exposure added.
- No Google Drive upload performed.
- No fake uploaded status.
- No fake Done.
- No raw local paths exposed.
- No Zapier writes.
- No SMB/Fork 2.
- No HeyGen generation.
- No external farmers.

Blockers

Developer-side Google Drive readiness:

- Blocker class: 'NONE'

Live Google Drive readiness:

- Blocker class: 'CREDENTIAL_GATED'
- Exact blocker: 'google_drive_credential_required'

Google Drive upload proof:

- Blocker class: 'OWNER_GATED' after credential exists.
- Required before GO:
 - Google Drive credential configured through approved secret path.
 - target folder configured through approved owner/admin path.
 - real upload adapter configured.
 - exact approved Bridge Session with 'google_drive.upload' scope.
 - upload result verified by provider response/link proof.

Rollback

Rollback command after commit:

- 'git revert 5f273e2'

Commit / Push

Commit hash:

- '5f273e2'

Push result:

- Pushed to 'origin/to-knowledge-mc'.

Next Day

Day 58 â Google Drive Proof has automatically started after Day 57 developer-side closure. Day 58 must not claim upload unless a real provider upload/list proof succeeds through approved scope

.
