Day 91 â No Fake UI Final Sweep

Status: developer-side closure passed.

Blocker classification: NONE for developer-side Day 91. Authenticated owner visual proof remains OWNER_GATED by missing owner browser session, as expected by the authenticated route smoke contract.

What Was Implemented

- Removed owner-visible fake/wiring residue from Mission Control shell surfaces without editing the approved Gateway mock HTML/CSS/class names.
- Replaced 'not wired', 'not implemented', 'coming soon', 'read_only_stub', and admin wire-up wording with truthful states such as backend required, unavailable, disabled, or approval locked.
- Added a no-fake UI regression test covering Mission Control shell surfaces, connector/status copy, Bridge approval routes, Firecrawl proxy messaging, and runtime failure copy.
- Updated Bridge approval queue mode from 'approval_requests_read_only_stub' to 'approval_requests_backend_required' when persistence is missing.

Files Changed

- 'public/designer-mission-control/src/app.jsx'
- 'public/designer-mission-control/src/backend/api-client.jsx'
- 'public/designer-mission-control/src/brain-sync.jsx'
- 'public/designer-mission-control/src/credentials-page.jsx'
- 'public/designer-mission-control/src/settings.jsx'
- 'public/designer-mission-control/src/surfaces.jsx'
- 'public/designer-mission-control/src/replicas/EmailProfilesPage.jsx'
- 'src/app/api/bridge/approval-requests/route.ts'
- 'src/app/api/bridge/owner-gates/route.ts'
- 'src/app/api/firecrawl/[...path]/route.ts'
- 'src/lib/monitoring-failure-states.ts'
- 'src/lib/no-fake-ui-final-sweep.test.ts'
- 'runtime/day-91-no-fake-ui-final-sweep/*'

Routes/Endpoints Changed

- '/api/bridge/approval-requests': missing-persistence mode now reports 'approval_requests_backend_required'.
- '/api/bridge/owner-gates': owner gate proof text now says protected-action responses and queue status, not stubs/placeholders.
- '/api/firecrawl/[...path]': unavailable SSE wording no longer uses implementation-placeholder language.

UI Behavior

- Mission Control owner-facing copy no longer claims fake backend wiring or future features.
- Agent/provider controls stay visibly disabled or unavailable with a truthful reason.
- Email profile docs and verification states now show unavailable/backend-required language instead of coming-soon or not-implemented language.
- Brain Sync report and Obsidian actions now explain the required backend/bridge state instead of implying hidden wiring.

Service/Runtime Behavior

- Runtime proof used a localhost-only standalone server on '127.0.0.1:3345'.
- No external writes were executed.
- No '.env' files were modified.
- No approved designer mock HTML/CSS/class names were modified.
- Proof server was stopped after route smoke and screenshot capture.

Tests Run

- 'pnpm exec vitest run src/lib/no-fake-ui-final-sweep.test.ts'
- 'git diff --check'
- 'git diff -- .env .env.local .env.production --exit-code'
- 'pnpm run typecheck'
- 'pnpm run build'
- 'pnpm test'
- 'node scripts/protected-route-smoke-contract.mjs http://127.0.0.1:3345'
- 'node scripts/authenticated-route-smoke-contract.mjs http://127.0.0.1:3345'
- 'node scripts/check-protected-file-invariants.mjs'
- 'node scripts/secret-scan-contract.mjs'
- 'node scripts/raw-exposure-scan-contract.mjs'

Deploy/Restart/Smoke Result

- Production build passed and synced static assets into '.next/standalone'.
- Local proof restart: standalone server started on '127.0.0.1:3345', route smokes completed, screenshot captured, server stopped.
- Protected route smoke: 'ok: true', 'routes_checked: 44', 'failures: 0'.
- Authenticated owner smoke: 'ok: true', 'blocker_class: OWNER_GATED', 'authenticated_smoke_proven: false', because no owner browser session was supplied.

Proof Artifacts

- 'runtime/day-91-no-fake-ui-final-sweep/no-fake-ui-proof.json'
- 'runtime/day-91-no-fake-ui-final-sweep/no-fake-ui-proof.png'
- 'runtime/day-91-no-fake-ui-final-sweep/protected-route-smoke.json'
- 'runtime/day-91-no-fake-ui-final-sweep/authenticated-route-smoke.json'
- 'runtime/day-91-no-fake-ui-final-sweep/protected-file-invariants.json'
- 'runtime/day-91-no-fake-ui-final-sweep/secret-scan.json'
- 'runtime/day-91-no-fake-ui-final-sweep/raw-exposure-scan.json'

Remaining Blocker

- OWNER_GATED: authenticated owner visual proof requires an owner browser session.
- Day 91 developer-side blocker: NONE.

Rollback Command

```
""bash
git revert --no-edit <day-91-closure-commit>
""
```

Commit/Push

- Base commit before Day 91 closeout: 'fc825f6e340f2f43faaf3a6bcde761afd2dc91ce'
- Closure commit hash: recorded in final closeout after exact-path staging and commit.
- Push result: recorded in final closeout after push.

Next Day

Day 92 â UX Final Closeout automatically starts after Day 91 commit/push.
