

Executive Result

Brain read adapters are ****PARTIAL GO****. Obsidian and MemPalace read paths are live through Agent Zero Bridge routes, Brain Sync is reachable, Graphify and Build-Wiki / Farmer are represented as read-only Gateway nodes, and unauthenticated access is blocked. Write actions remain correctly Bridge Session-gated.

Production Route Evidence

System	Route Evidence	Read	Write	Execution	Notes
---	---	---	---	---	---
Brain Sync	200 authenticated, 401 unauthenticated	yes	no direct write	false	readonly status route
Obsidian	200 status and search	yes	false in adapter	false	safe search returned 3 results
MemPalace	200 status/query	yes	false in adapter	false	raw private dump disabled
Graphify	200 Gateway node	yes	false	false	graphify_write_adapter_disabled
Build-Wiki / Farmer	200 Gateway node	yes	false	false	Run Now requires Bridge Session and owner approval

Optional Write Adapter Status

System	Write Status	Bridge Session Required	Current Decision
---	---	---	---
Obsidian	available only through Bridge Session gateway actions	yes	not executed
MemPalace	available only through Bridge Session gateway actions	yes	not executed
Graphify	disabled	yes	blocked
Build-Wiki / Farmer	Run Now protected action only	yes	blocked without owner approval

Safety Confirmation

- No Brain write was executed.
- No raw vault dump was returned.
- No raw private memory dump was returned.
- No Build-Wiki/Farmer execution occurred.
- No secrets were printed or committed.
- No .env changes were made.
- No raw local paths are included in owner-facing status.

Completion Estimate

Component	Percent	Status
---	---	---
Brain Sync visibility	85%	reachable and protected

Obsidian read	90%	live safe search/status
Obsidian write	0%	not executed, Bridge Session required
MemPalace read	85%	live safe query/status
MemPalace write	0%	not executed, Bridge Session required
Graphify read/status	70%	Gateway node visible
Graphify write	0%	disabled
Build-Wiki / Farmer read/status	85%	visible under OpenClaw+
Brain overall	72%	PARTIAL GO

Remaining Blockers

Blocker	Impact	Exact Next Step
Brain writes require Bridge Session	Cannot mark write adapters GO.	Open scoped Bridge Session and run safe write probes only if approved.
graphify_write_adapter_disabled	Graphify cannot update graph live.	Add or enable Graphify write adapter behind Bridge Session.
buildwiki_run_now_requires_bridge_session_and_owner_approval	Build-Wiki Run Now cannot execute from read proof.	Use exact scoped Build-Wiki approval flow only.

Final Decision

Brain read adapters: ****PARTIAL GO****.

Read/status paths are live and protected. Writes remain intentionally blocked.
