NEXT-4 â Gateway UI Shell Navigation Fix

Objective

Keep Gateway owner visual proof moving from PARTIAL toward GO by fixing navigation/scroll shell defects.

Result

PARTIAL+ (navigation and scroll hardening implemented; owner re-test still required for GO).

Implemented

1. Added visible top exits on Gateway/Agent Hub surfaces:
 - Mission Control Home
 - Dashboard
 - Gateway Overview
 - Agent Hub
2. Added clickable breadcrumb:
 - Mission Control / Gateway / Agent Hub
3. Hardened scroll behavior for long Gateway/Agent Hub pages and added bottom padding so content below-the-fold stays reachable.
4. Added sticky top shell controls on Gateway + Agent Hub + Paperclip drill-down:
 - exits remain visible while scrolling,
 - breadcrumb remains clickable above the fold,
 - owner no longer depends on browser back to escape the page.
4. Preserved aliases:
 - '/agent-network'
 - '/agents'
5. Kept no-fake-button contract behavior.

Commit

- pending in current workstream batch (includes additional sticky-shell + scroll hardening)

Files (UI Fix Batch)

- 'src/components/gateway/GatewayControlShell.tsx'
- 'src/components/gateway-agent-hub/AgentHubControlCenter.tsx'

Validation Snapshot

- typecheck PASS
- build PASS
- tests PASS ('138' files / '1250' tests)
- button-contract route scan PASS
- protected-file invariant scan PASS

Blocker to GO

- Owner must confirm fixed UX in authenticated browser re-test:
 - exits visible
 - breadcrumb clickable
 - scroll natural (no trap)
 - no trap behavior

Files Changed

- 'runtime/next-gateway-ui-shell-navigation-fix.md'
- 'runtime/next-gateway-ui-shell-navigation-fix.pdf'

Next Step

Collect owner re-test confirmation and then promote this UI lane from PARTIAL to GO.
