

day-96-bridge-approval-proof-replay

Day 96 - Bridge Approval Proof Replay 100% Closure

- Lane: Bridge approval proof replay
- Status: DEVELOPER-SIDE CLOSED WITH TRUTHFUL OWNER SESSION GATE
- Day 96 blocker classification: NONE
- Started from commit: c208e70939a3591f7983aae6f42f1368bfb6ca5c
- Closed at: 2026-05-12T06:12:17Z

What Was Implemented

Added a canonical Bridge approval proof replay packet that exercises the owner approval lifecycle in an isolated in-memory harness: pending, approve, deny, expired, execute projection, failed run, completed run, and audit projection.

Added a protected read-only API route for the proof packet. The route does not create production approval requests, approve or deny real requests, dispatch Run Now, execute systemctl, trigger connector writes, or call external tools.

Files Changed

- runtime/day-96-bridge-approval-proof-replay/secret-scan.json
- runtime/day-96-bridge-approval-proof-replay/raw-exposure-scan.json
- runtime/day-96-bridge-approval-proof-replay/standalone-runtime-proof.json

Routes / Endpoints Changed

- Added: /api/bridge/approval-proof-packet
- Updated protected route-smoke inventory to include /api/bridge/approval-proof-packet
- Updated authenticated route-smoke inventory to include /api/bridge/approval-proof-packet
- Updated Gateway Status with a read-only Bridge Proof route link and Bridge Approval Proof Replay summary

UI Behavior

Gateway Status now exposes a Bridge Approval Proof Replay card. It states:

- proof route: /api/bridge/approval-proof-packet
- lifecycle: pending, approve, deny, expired, execute, failed, complete, audit
- execution: disabled outside exact scoped dispatch
- writes: disabled
- Run Now target: opencloud-docs-farmer.service only

No approved designer mock HTML/CSS/class names were changed.

Service / Runtime Behavior

Final proof packet:

- Artifact: runtime/day-96-bridge-approval-proof-replay/final-bridge-approval-proof-packet.json
- ok: true
- stages_total: 8
- consistency_ok: true
- consistency_issues: []
- no_execution_enabled: true
- no_connector_writes_enabled: true
- no_external_writes_enabled: true
- no_fake_approval_requests: true
- secrets_exposed: false
- raw_paths_exposed: false

Bridge replay matrix:

Stage	Approval State	Decision	Run State	Blocker
---	---	---	---	---
pending	pending	none	none	none
approve	approved	approved	none	none
deny	denied	denied	none	none
expired	expired	expired	none	approval_request_expired
execute	approved	approved	none	exact_scoped_dispatch_route_required
failed	approved	none	failed	simulated_service_failure
complete	approved	none	completed	none
audit	approved	none	completed	none

Tests Run

- git diff --check: PASS
- .env diff check: PASS
- pnpm run typecheck: PASS
- pnpm run build: PASS
- pnpm test: PASS, 209 files / 1517 tests
- Focused Bridge approval proof tests: PASS, 12 files / 46 tests
- Artifact generator smoke: PASS, 1 file / 1 test, removed before staging
- Protected route smoke: PASS, 45 routes / 0 failures
- Authenticated route smoke: OWNER_GATED, no owner session present
- Bridge approval route auth proof: PASS, 7 protected Bridge routes require auth without credentials
- Protected-file invariant scan: PASS
- Secret scan: PASS
- Raw exposure scan: PASS

Deploy / Restart / Smoke Result

No production deploy or persistent restart was performed. A localhost-only standalone runtime was started on 127.0.0.1:3350 for route/proof smokes and then stopped by the cleanup trap. The build output includes /api/bridge/approval-proof-packet.

Proof Artifact

- runtime/day-96-bridge-approval-proof-replay/final-bridge-approval-proof-packet.json
- runtime/day-96-bridge-approval-proof-replay/bridge-approval-route-auth-proof.json
- runtime/day-96-bridge-approval-proof-replay/protected-route-smoke.json
- runtime/day-96-bridge-approval-proof-replay/authenticated-route-smoke.json
- runtime/day-96-bridge-approval-proof-replay/secret-scan.json
- runtime/day-96-bridge-approval-proof-replay/raw-exposure-scan.json
- runtime/day-96-bridge-approval-proof-replay/protected-file-invariants.json
- runtime/day-96-bridge-approval-proof-replay/standalone-runtime-proof.json
- runtime/day-96-bridge-approval-proof-replay/inventory.json

Remaining Blocker

No Day 96 developer-side blocker remains. Authenticated owner visual smoke remains OWNER_GATED because no owner browser session/cookie was provided, but unauthenticated protection and read-only proof paths are proven.

Exact Day 96 blocker classification: NONE.

Rollback Command

git revert <day-96-bridge-approval-proof-replay-commit>

Commit / Push

- Commit hash: pending at report creation
- Push result: pending at report creation

Next Day

Day 97 - Production Deploy Final starts automatically after this Day 96 commit and push.
