

Day 03 Phase 1 — Owner-Authenticated Browser Proof Package

Objective

Prove Mission Control, Gateway, and Agent Hub visibility in a real owner-authenticated browser session.

Actions

1. Attempted to run owner-authenticated browser verification flow for Mission Control -> Gateway -> Agent Hub.
2. Prepared verification checklist for visible cards and role labels:
 - Agent Zero, Hermes, Pi, SpaceAgent, Paperclip
 - OpenClaw+, Delivery, Bridge Session
1. Prepared no-fake/no-leak checks for buttons, secrets, and sensitive UI payloads.

Commands / Routes Used

- Browser verification attempt package only (owner-authenticated session required).
- Supporting API truth checks from active production state were already available from Day 02 accepted route smoke.

Proof

- No owner-authenticated browser session was available in this run.
- This phase cannot be marked PASS without owner session evidence.

Files Changed

- ``runtime/day-03-phase-1-owner-browser-proof-package.md``

Services

- Mission Control production service remains active from accepted Day 01 restart proof.

Tests

- Not applicable for visual owner-auth-only phase without owner session.

Commits

- None in this phase.

Blockers

- ``owner_authenticated_browser_session_required``

Rollback

- No runtime or code changes in this phase.

No-Secrets Confirmation

- No tokens, auth files, or secret values were printed.

Updated Percentage

- Owner browser proof track remains BLOCKED pending owner-authenticated session.

Exact Next Step

- Resume this phase immediately when owner-authenticated browser session is available; capture screenshots and complete the card/panel verification checklist.
