

Day 03 Phase 6 — Google Drive / OneDrive Adapter Readiness

Objective

Move Drive/OneDrive from generic blocked status to exact implementation readiness truth.

Actions

- 1. Checked Google Drive adapter status route.
- 2. Checked OneDrive adapter status route.
- 3. Confirmed connector metadata is visible while upload runners remain disabled.
- 4. Confirmed Bridge Session requirement remains enforced for any future upload action.

Commands / Routes Used

- ``GET /api/bridge/agent-zero/google-drive/status``
- ``GET /api/bridge/agent-zero/onedrive/status``

Proof

Connector	Current State	Evidence
---	---	---
Google Drive	BLOCKED	<code>`upload_connector_configured=false`, blocker `google_drive_report_delivery_adapter_not_configured`</code>
OneDrive	BLOCKED	<code>`upload_connector_configured=false`, blocker `onedrive_report_delivery_adapter_not_configured`</code>

- Both routes return truthful readiness state and do not claim fake upload success.
- Upload flow remains gated by Bridge policy.

Files Changed

- ``runtime/day-03-phase-6-drive-onedrive-adapter-readiness.md``

Services

- Drive/OneDrive status routes active.

Tests

- Adapter readiness route checks: PASS for honest blocked status.

Commits

- None in this phase.

Blockers

- `google\_drive\_report\_delivery\_adapter\_not\_configured`
- `onedrive\_report\_delivery\_adapter\_not\_configured`
- `active\_bridge\_session\_required` (for scoped upload execution once adapters exist)

Rollback

- No code/config changes were applied.

No-Secrets Confirmation

- OAuth/token values were not printed.

Updated Percentage

- Drive and OneDrive delivery remain BLOCKED pending adapter implementation.

Exact Next Step

- Implement provider-specific upload runners plus scoped Bridge execution hooks, then run single-file upload proofs per provider.
