

Gateway UI Closeout 4 â Owner Retest Final

Date: 2026-05-08

Status: PARTIAL GO (owner re-test required after shipped frame fix)

What Was Fixed

- Removed trapped mount behavior in Gateway FULL v3 frame host.
- Added explicit frame-level exits:
 - Mission Control Home
 - Gateway Overview
 - Agent Hub
- Added clickable breadcrumb/route context in frame host nav.
- Preserved FULL v3 mock mounting and shared design tokens/classes.

Owner Retest Checklist (Required)

1. Log into Mission Control.
2. Open '/gateway'.
3. Open '/gateway/agent-hub'.
4. Scroll vertically to confirm page is no longer trapped/static.
5. Use 'Gateway Overview' exit.
6. Use 'Mission Control Home' exit.
7. Verify 'Agent Hub' quick exit works.
8. Verify no fake buttons.
9. Verify no raw local paths.
10. Verify no secrets.
11. Verify OpenCloud architecture label is not shown except literal legacy service name 'openclo
ud-docs-farmer.service'.

Decision Rule

- GO only after owner confirms usable scroll + exits + acceptable FULL v3 fidelity.
- If owner still sees trapped behavior, blocker remains:
 - 'gateway_ui_design_fidelity_scroll_defect'
