

Day 2 Phase 013 - Hermes Lieutenant Behavior Proof

Generated: 2026-05-07 23:05 EDT

Result: PARTIAL GO - contract response safe, live adapter blocked

Objective

Prove the Hermes-facing Mission Control behavior stays safe while live chat is blocked.

Actions Completed

- Ran safe Hermes test-chat prompts through the authenticated route.
- Confirmed responses do not claim execution or completion.
- Confirmed Agent Zero is named commander in the guarded response.
- Confirmed protected actions remain disabled.

Files Changed

No production source files changed in this phase. Report artifacts only.

Commands And Routes Used

- POST /api/bridge/hermes/test-chat with commander, role, protected-action, and Gateway-visibility prompts.

Proof

Requirement	Observed	
---	---	
Commander answer	Agent Zero	
Hermes role	Lieutenant / skills and workflow planning	
Protected actions	disabled	
Raw paths	not present in owner-facing response preview	
Fake Done	not present	
Live adapter	blocked	

Blockers

Live Hermes answer still cannot be claimed because /api/bridge/hermes/test-chat returns hermes_called:false.

Tests

Hermes bridge unit tests passed: 20 tests. Agent Zero/Hermes collaboration tests also passed.

Services

mission-control.service active after Day 1 restart. hermes-gateway.service active. playwright-mcp.service active. No new public service exposure was introduced.

Commits

Starting Day 2 HEAD: 9f31233. Day 2 report commit pending at report generation time.

Rollback

Rollback for Day 2 report-only artifacts: revert the Day 2 documentation commit after it is created. No service configuration rollback is required because no service settings were changed.

No-Secrets Confirmation

No credential values, auth files, API keys, tokens, passwords, or environment values were printed or committed. Environment and credential checks were boolean-only. No .env file was changed.

Updated Percentage

Hermes behavior: 58% PARTIAL / guarded read-only

Exact Next Step

Keep UI and reports labeling Hermes as gated until the live test-chat route returns hermes_called:true from a safe adapter.
