Blockers

Tests

Pi dispatcher test file passed: 9 tests. No execution or writes were enabled.

Services

mission-control.service active after Day 1 restart. hermes-gateway.service active. playwright-mcp.service active. No new public service exposure was introduced.

Commits

Starting Day 2 HEAD: 9f31233. Day 2 report commit pending at report generation time.

Rollback

Rollback for Day 2 report-only artifacts: revert the Day 2 documentation commit after it is created. No service configuration rollback is required because no service settings were changed.

No-Secrets Confirmation

No credential values, auth files, API keys, tokens, passwords, or environment values were printed or committed. Environment and credential checks were boolean-only. No .env file was changed.

Updated Percentage

Pi route gauntlet: 80% PARTIAL GO / SHADOW

Exact Next Step

If owner wants Pi beyond shadow mode, install/prove a local-only runtime with no write tools and repeat this gauntlet through that runtime.
